Not a planding abundance and quality of her milk.
Farmer Surgen had no cow. To possess one was the ambition of his life.
The two neighbors were friends and exchanged visits. During one of Farmer Miller's visit he caught a smile from Miller's visit he caught a smile from Mrs. Surgen. Women are scarce in that section, and Miller envied his neighbor the possession of such a wife, as much as the neighbor envied him for his cow. One evening Miller told Surgent had been supported in the surgent and some many less miles and the chamber action the husband to name his mich chamber, hence there are nearly four them.

much as the neighbor envied him for his cow. One evening Miller told Surgeh that he loved Mrs. Surgen and asked the husband to name his price for her.

"Gimme yer cow and I'll give yer my wife," said Surgen, promptly.

The bargain was made then and there. Mrs. Surgen packed up her belongings, while her husband went over for the cow. All went well for a few months, but now Farmer Miller is in a peck of trouble over his wife. In the past few weeks several mysterious fires have occurred in the vicinity, and last Thursday the schoolhouse was fired. Investigation proved, it is said, that Mrs. Miller poured kerosene oil on the books and papers and applied a match to them. So a constable arrested her. She denied all knowledge of the fire, but her little son confirmed the public suspicion. It is said she was provoked by jealousy of the teacher of the school.

He was an elderly person and wore a long military coat. As he entered Prospect Park he told a hackman that he had no money and that he expected to sleep in the river.

no money and that he expected to sleep in the river.

The hackman notified the park officials, who questioned the stranger. He laughed and said he had spoken in a joke. He proceeded toward Bath Island, while on the bridge midway between the shore and the island he jumped into the river and was hurled over the falls. His body was carried along by the current until it lodged on a rock near Chapin Island. The man's real name was James Haffa. He was employed, at the Marque Hospital in Philadelphia. He was on his way home from Canada and had been on a prolonged debauch here.

REACHING TOWARD HIGH-TIDE COLUMBUS (O...) Nov. 5.—Since 19 o'clock the Republican State Committee claims that the plurality for Bushnell will exceed that of 80,000 for Gov. McKinley in 1893, with which year's vote they are comparing returns. There are some at headquarters who say that the returns will show a Republican plurality almost equal to that of last year, 137,000, the high-water mark. Chairman Kurtz gave out the following. "Returns received at 10 o'clock Indicate that the Republicans have carried the State by a plurality not less than that given two years ago, and elected a decisive majority of the members of the next General Assembly."

Chairman Kurtz will not claim over the next General Assembly. "Chairman Kurtz will not plaim over \$0,000 at most, although others in the headquarters go higher. Chairman

Kurtz does not estimate that the Republicans will have two-thirds of the Legislature, but he says that the Republican majority in both branches will be so large that the usual interest is not taken in ascertaining the exact number of Republicans and Democrats on joint ballot for United States Senator.

At Democratic State headquarters at 10 o'clock an announcement was made that Ohio had gone Republican by a decisive majority in the Legislature as well as a large plurality on the State ticket. Some of the Democratic managers say that the result is due to the same cause as in 1893 and 1894, opposilicket. Some of the Democratic managers say that the result is due to the same cause as in 1893 and 1894, opposition to President Cleveland's administration and the iast Congress. As both parties had the same financial plank, the sliver question was not an issue in the campaign. The tariff was the only national issue between the parties.

The Populists cast about 20,000, and the Socialists about 2000. Neither the third, fourth nor fifth parties, nor the A.P.A. affected the result. The contest was between the Republicans and Democrats on the tariff and State issues.

A NET REPUBLICAN GAIN OF OVER NINETEEN THOUSAND.

NEW YORK, Nov. 5.-New York State has been carried by the Republicans by pluralities ranging from 48,000 to 55,000, compared with the plurality to 55,000, compared with the plurality of 24,484 for the head of the ticket two years ago. Republican gain of 12,903, compared with the vote of two years ago.

Maintaining the same average, the gains will reach 23,000 outside of greater New York. In the two cities below the Harlem, the Democratic plurality of 60,343 two years ago has been reduced about 12,000, giving the State to the head of the Republican ticket by 50,000 plurality in round numbers.

In 1893, Palmer (Rep..) for Secretary of State, had a plurality of 84,827 in New York State above the Harlem, while Myer (Dem..) had a plurality in New York and Kings counties of 60,343, giving the Republican candidate a plurality in the Rep

This year Palmer, for Secretary of State, has carried the State above the Harlem, based upon returns from 1795 election districts out of a total of 3383, more than one-half outside election districts, by probably 100,000 plurality. King (Dem.,) has carried New York and Kings counties by a plurality of nearly 50,000, giving the head of the Republican ticket a safe plurality of 50,000 in the State at large.

The two branches of the Legislature remain as before under the direction of the Republicans. The election throughout the State was orderly and rapidly-conducted and the results were quickly complied.

conducted and the results were quickly compiled.

All the talk about the difficulty of handling the bianket ballot went for naught, so far as the success or failure of the blanket ballot was concerned, the advices from all over the State showing that there was little or no trouble and that the ballot was so much of a success that the vote was polled quicker than ever before.

The figures from New York city in the early evening showed that there was little or no chance for the Democratic State ticket, for the meager majorities given in the various districts indicated so small plurality which the Republicans bring down to Harlem bridge.

The total vote of the State shows a

The total vote of the State shows a falling off compared with the vote of 1893, the decrease being confined however, to the districts north of the Harlem River. The city vote is fully equal to that of two years ago.

to that of two years ago.

At midnight returns from 2200 election districts out of 3383 above the Harlem, or two-thirds of the State outside of New York and Kings counties, give Palmer (Rep..) for Secretary of State, 285.802; King (Dem..) 182.786. showing a Republican plurality of 103.016, a Republican gain of 19,332 compared with 1893.

THE FIGHT IN GOTHAM.

NEW YORK, Nov. 5.-The election in New York city was fought upon en-tirely different lines from that in the State. The fight was between the straight Tammany and Independents. On account of the various officers voted for, the returns were late in coming in, but Tammany's victory was never in doubt, and its plurality will probably be between 18,000 and 22,000. The city complete, with the exception of 163 dis-tricts, gives Hamilton (Fusion) 103,547 Purroy (Tammany) 119,376 on the vote

for County Clerk.

The Tammany candidates for the leading positions were Justices of the Supreme Court, Charles H. Truax, Fred-Supreme Court, Charles H. Truax, Frederick Smith and Charles F. McLean; County Clerk, H. D. Purroy; Register, William Lapmer; Judges of General Sessions, M. F. McMahan and Joseph Newberger; Justices of the City Court, Robert A. Wick, John P. Schuchman and F. F. O'Dwyer.

The vote of the Independent county Democratic organization was considerably below 10,000, and the Good Government ticket vote will scarcely reach 10,000. The Socialists polled more than 9000.

Dr. Parkhurst says he is not discour aged at the result; that a lesson has been learned, and that the Committee of Fifty should never have gone into a fusion movement, although it took what its members thought was the best

course.

The Republican chairman, Lauterbach, says the lesson of today was that there would be no more fusion. "Fusion is dead forever," he said, and politicians of every faction echo his declara-

tion.

The nearly-completed returns show that Tammany fell behind the vote for the Democrat State ticket by from 20,-000 to 24,000 votes.

of the Harlem River, leaving 864 districts to be heard from, at 1:30 o'clock this morning, gives Palmer (Rep..) for Secretary of State 321,476; King (Dem..) 207,587, a Republican plurality of 113,891, showing a 'Republican gain of 25,152, compared with the vote of 1893.

The same relative gain will leave the Republicans a plurality of 118,590 north of the Harlem. Deducting the Democratic plurality of 41,612 for the head of the State ticket in New York city and the estimated. Democratic plurality of 6000 in Brooklyn, the Republican plurality in the State at large will be

LITTLE 'SCRATCHING DONE. NEW YORK, Nov. 5.—Dispatches from various parts of the State, received by the Associated Press, report fair weather, and the indications are that the vote will be close. In general, it is believed that little scratching is being core.

THE BETTING. THE BETTING.

NEW YORK, Nov. 5.—The Herald today says that very little interest is
manifested in betting on the election.
Thomas H. Kerr placed about \$7000 at
2 to 1, on the Tammany local ticket. He
bet \$2000 to \$1000 with Emery G. Hodges.
The name of the person who took the
\$5000 bet was not given. The money is
reported to have been put with Wilcox

Benjamin C. Williams placed several small bets at the same odds in favor of Tammany. All of the bets on the Stock Exchange were that six out of ten on the county ticket would be elected. In case only five out of the ten men were elected, the bet would be a draw. Several bets were placed by Wall-street men up town at the same odds, but they were on the basis that the leading candidate would be elected on the Tammany ticket. A few unimportant bets of 2 to 1 on the Tammany ticket were made by Marcus Helm, on the Consolidated Exchange.

A RUSH FOR RETURNS.

A RUSH FOR RETURNS.

NEW YORK, Nov. 5.-Precisely at 4 NEW YORK, Nov. 5.—Precisely at 4 o'clock this afternoon the polls were closed in the 1392 election district of this city and the counting of votes was begun a few minutes later. Candidates and party leaders who had spent the day working about the booths hurried off to the respective headquarters, where arrangements had been made to receive early returns. There was a great rush made for Tammany Hall, where, as in past years, the returns are read. The voting in this city passed off very quietly and there was little trouble about the polls.

A SMALL COMPARISON

A SMALL COMPARISON. NEW YORK, Nov. 5.—Comparisons on 150 districts of this city on Secre-tary of State show a Democratic gain

of 4373.

NEW YORK, Nov. 5.—Returns from one-fourth of the districts in New York city indicate that the Democrats will carry the city on the State ticket by 25,000.

TAMMANY BIDS LOW. TAMMANY BIDS LOW.

NEW YORK, Nov. 5.—A Morning Advertiser bulletin, posted at 7:30 o'clock this evening, says that at the Democratic headquarters in this city it is claimed by 50,000 majority, while Tammany claims it by 40,000.

KINGS COUNTY UNUSUALLY QUIET.

BROOKLYN, Nov. 5.-The elections in Kings county passed off very quietly. There were few arrests, and quietly. There were few arrests, and no election in years has been characterized by fewer clashes between the contesting parties. As far as has been ascertained at this hour, the new ballot law has worked well, the votes were quickly polled and there appears to be general satisfaction with the new system of voting. Many voters made mistakes in placing the crosses where they went outside their party column, but, on the whole, the vote as cast represents fairly well the intent of the voter.

NEW YORK, Nov. 5.—The World extra thus summarizes the results:

"Returns from one-half of the election districts of this city indicate a majority of over 40,000 for the Democratic State ticket. Tammany leaders are claiming the city by 20,000 majority. The Tammany ticket has won in this city and county by about 15,000 majority.

"Returns just received from districts in this city indicate that the Republicans have carried the State, the Democratic vote in the city not being large enough to wipe out the Republican majority above Harlem bridge. TRENTON (N. J.,) Nov. 5 .- At midnight it is difficult to even forecast the election in New Jersey, for the reason that official figures are not to be had and also for the reason that Essex county is conceded to be the pivotal point in the absence of trustworthy fig-ures. Both parties claim to have car-

point in the absence of trustworthy ligures. Both parties claim to have carried the county, the Democrats claiming a majority of 1000 and the Republicans a-majority of 5000.

Franklin Murphy, chairman of the State Republican Committee, claims to have figures from the twenty-one counties of the State, which give Griggs 15,000 plurality. On the other hand, Edward Young, chairman of the Democratic Committee, claims the State for McGill by from 5000 to 10,000 plurality. It is certain, however, that the Republicans have elected four of the seven Senators. This is not material, as the Senate would still be Republican although the Democrats were to elect all the seven. THE BULLETINS.
BALTIMORE, Nov. 5.—The heaviest core ever polled in Maryland is being BALTIMORE, Nov. 5.—The heaviest vote ever polled in Maryland is being cast amid scenes of almost unparalleled excitement, accompanied by occasional acts of lawlessness and disorder. The day is balmy. Both sides appear to have out their full strength, and much bitterness is manifested among the watchers of both parties. Before the polis opened, John Smith, a Democratic watcher, was shot in the left breast and slightly wounded by Horace E. Van Tassel, Republican. The latter was arrested. Two hours later. Charles G. Baldwin, one of the watchers for the Reform League, was severely cut over the right eye in fight over the arrest of a repeater.

The managers of the Evening News predict that Baltimore city will give a majority of 10,000 for the Republican that Baltimore city will give a majority of 10,000 for the Republican ticket. The indications are that Hurst

It also concedes the election of a Republican Legislature, which insures a Republican successor to United States Senator Gibson, and says that the entire Republican ticket is elected by good majorities.

SPECIALS TO THE STAP TURE. SPECIALS TO THE STAR.

Washington, Nov. 5.-The Star's spe ials from Baltimore state that Democratic State Committee concedes the election of Lowndes (Rep.) for Gov-ernor, and Hooper (Rep.) for Mayor. A REPUBLICAN LANDSLIDE.

BALTIMORE, Nov. 5.—There are mough returns to indicate that there has been a landslide in Maryland and has been a landslide in Maryland and that the Democratic ticket is under, by majorities ranging from 6000 upward.

There seems to be no room for any doubt that the Republicanshave elected their entire State and city tickets and will have a majority in the next Legislature, which will choose a successor to United States Senator Gibson. Even Howard county, the home of Senator Gibson, has apparently reversed its normal Democratic majority of 500 and gives Lowndes (Rep.,) for Governor a majority of at least that number of votes.

gives Lowndes (Rep.,) for Governor a majority of at least that number of votes.

Baltimore city goes for the Republican ticket by a majority ranging from 6000 to 8000, and both branches of the City Council will probably be Republican for the first time in many years. In fact, there is not a leg left for the Democratic party to stand upon, though this has long been considered one of the safest Democratic States in the Union. Telegrams from the chairmen of county committees to the Associated Press indicate that Washington county has gone for Lowndes by 1200 votes, a Republican gain of 900; that Caroline county will give him a majority of 50, a Republican candidate, gives him 1500, a Republican candidate, gives him 1500, a Republican gain of 650. Thus it is in all parts of the State, and not even the most sanguine Democrats claim at midnight to have carried anything worth carrying.

KENTUCKY.

HARDIN'S MAJORITY NOT BE-LIEVED TO EXCEED 1700. LOUISVILLE, Nov. 5.—Scattering reurns received up to 1 o'clock, includ ing the city and county, give Hardina majority of 1700. These returns come a majority of 100. Inese returns come from officials in every county in the State. Four years ago in the race for Governor the Democratic majority was 29,081, and some idea of the present result may be gleaned from the fact that the Republicans made the follow.

that the Republicans made the following gains in counties remotely situated: Adair, 248; Allen, 473; Mercer, 226; Madison, 293; Breckinridge, 840; Boyd, 568; Cumberland, 257; Frankin, 588. In this county the Republican gain will be over 11,000.

The Courier-Journal, in its midnight exita, says: "The returns possible at this hour are too far from complete to do more than serve as an indication. They show generally that the Democrats have suffered losses in most of the counties. In some counties they seem to have gained slightly. The vote was not as heavy as had been expected."

The reports are too meager for general use. The indications at this writ ing are that the vote of this county will decide the race for Governor. Haywood, Republican, has been elected State Treasurer by about 150,000 plurality, a Republican gain over 1893, which was also an off-year, of about 15,000. This State also elects seven judges of the new Superior Court. Of these the six Republicans nomi-inated are elected. The seventh man on the ticket is in doubt. an A.P.A., was seriously wounded. The rioters scattered.

A LACK OF FIGURES.

LOUISVILLE, (Ky.) Nov. 5.—The Republican and Democratic newspapers are displaying the returns for the benefit of great crowds which pack the streets about the offices. Favorable figures are so meager that neither side has the advantage in the display. On both sides the leaders are claiming the victory in this city, the Democrats by a small majority and the Republicans by a majority ranging up to 8000.

It seems that the Citizen's ticket did not cut much of a figure, as the old parties will get in nearly their average votes. The ante-election claim that Hardin would be scratched because of his attitude on the money question has failed to materialize. Scattering returns show that Hardin will get the party vote. The Republicans elected five of the trustees for the \$30,000,000 drainage canal. The terms of the election for these positions are that each party nominates five candidates and the one candidate receiving the smallest num-ber of votes is defeated. Each party is sure of four elected trustees and the Republicans secured the odd man, as the man receiving the smallest number of votes was Duffy, a Democrat. All the Republican candidates were about 30,000 ahead of the Democrats.

CHICAGO, Nov. 5.—The election in his city today was for two Judges of ecutive chamber.

In brief, the result is a clean sweep, for the Republican party in the State, it having suffered in no way from the supposed defection caused by the A.P.A. movement. the Superior Court, nine trustees of the the Superior Court, nine trustees of the sanitary district, and for or against the Torrens land-title system. There were four tickets, Republican, Demoratic, People's and Socialist-Labor. Comparatively little attention was paid to the two latter. There was a woeful lack of interest. The weather was fine. Up to 11 o'clock not a third of the gegistered vote had been cast. The indications are for the lightest total vote in years. THE BULLETIN.

BOSTON, Nov. 5.—The election today is proceeding quietly throughout the State. The weather is superb, but up to noon the vote has been unusually light. Not much is heard of the A.P.A. vote, and the prediction is made that the scratching will not be greater this year than in the past. The voters are expected to express themselves on the question: "Do you consider it expedient to grant municipal suffrage to women?"

REPUBLICANS ELECT A CHIEF
JUSTICE AND MOST COUNTY TICKETS.

KANSAS CITY (Mo.,) Nov. 5.—Re-turns from Kansas up to midnight in-dicate that the Republicans have car-ried a majority of the county tickets in their entirety by pluralities of from 200 to 800 and that David Martin, Republican candidate for Chief Justice of the Supreme Court, is re-elected by a handsome majority. A BATCH OF SURPRISES.

TOPEKA (Kan.,) Nov. 5.-Today's election has contained a number of surelection has contained a number of sur-prises. Holliday, Independent candi-date for Chief Justice, has carried Shawnee, Sedgwick and Atchison counties, and, although it is not be-lieved that there is any chance of his election, he has received a large vote. The anti-Prohibitionists, Populists and Democrats have succeeded in electing Kepley, the fusion candidate for sheriff, owing to the large number of Republicans in the Prohibition element who did not vote. Republicans have halge. Williams's plurality is 2493.

KANSAS CITY (Kan.) Nov. 5.—Returns up to noon indicate but little of what the result will be in Kansas, where a Chief Justice of the Supreme Court, two State Senators, several minor judges and county officers are being voted for. In Atchison and Olathe the Republicans, apparently, are having everything their own way. The weather is universally pleasant, with rain threatening this afternoon. At Leavenworth, Wichita, Olathe and Topeks great interest is shown at the polls, while at Lawrence, Atchison, Emporia and some other points, only passive interest is manifested. As a rule, a large vote will be polled.

NEBRASKA.

REPUBLICAN JUSTICE CHOSEN-POPULISTS MAKE BIG GAINS.
OMAHA (Neb.,) Nov. 5.—Returns
from various portions of Nebraska show
that Norval (Rep.,) for Supreme Court,
is elected by a large majority and that
the Republicans made gains on all
sides.

One of the surprises developed by the late returns is the great strength of late returns is the great strength of Maxwell, Populist candidate for Supreme Judge. His vote is next to Norval's and is almost double that of both the Democratic candidates for the same position. The vote for the two Democratic candidates is very small.

THE BULLETINS. OMAHA, Nov. 5.—Throughout the State election day opened clear, with the exception of the extreme western tier of counties, where a light snow is falling. This condition insures a fair vote nearly all over Nebraska.

DEMOCRATIC FACTIONS. OMAHA, Nov. 5.—In some of larger cities, spirited contests are larger cities, spirited contests are besing waged between the two wings of
the Democratic party. Friends of silver insist that Federal employees are
making themselves obnoxious by their
activity in the interest of the "sound
money" Democratic State ticket. The
Republicans are voting steadily for
their candidates. Judge Maxwell, the
venerable jurist, is receiving good support on the Populist ticket for the Supreme Court.

BURCH LEADING IN OMAHA. OMAHA, Nov. 5.—At 8:30 o'clock to-dight in the city of Omaha twentyseven precincts give Burch, for Mayor 2700; Brown, Citizens' ticket, 2584.

THE STAY-AT-HOME VOTE. OMAHA, Nov. 5.—The results of the election throughout Nebraska at 9 o'clock are too vague to indicate anything as to the individual candidates, but the feature of the day has been the general absence of interest. The stayathome vote was very heavy. This is attributed to the fact of an off-year and the absolute certainty that with four State tickets the Republicans could not possibly be defeated. In the rural districts this was found to be very much the case. The vote cast will not represent two-thirds of the population.

GAINS.

OMAHA, Nov. 5 .- At 11:30 o'clock re OMAHA, Nov. 5.—At 11:30 o'clock re-turns have begun to come in slowly from the State. The leading features of the returns are the difference between the vote for Maloney, administration Democratic candidate for the Supreme Court, and Phelps, silver Democrat, showing enormous gains for the admin-istration man. Most of the returns give Maloney double that of his op-ponent.

while it cannot affect the result, since the Republican candidate is polling the full party vote, it is of great interest as showing how Nebraska Democrats stand on the financial issues. Two years ago the relative strength of the silver and gold Democrats was in the ratio of 25 to 1.

The rest of the Republican ticket is elected by decidedly safe majorities. The City Council will stand twenty-four Republicans and eight Democrats. Of the aldermen elected today 12 are Republicans and 4 Democrats. In round numbers the total vote today amounted to 31,000, as compared with 43,000 in the city election two years ago. Confidence in Pingree's winning qualities contributed to the rather light vote.

VIRGINIA. THE STRAIGHT DEMOCRATS BEAT

THE "FAIR-ELECTION" TICKET. RICHMOND (Va.,) Nov. 5.—The election RICHMOND (Va..) Nov. 5.—The election today closed one of the most apathetic campaigns known in Virginia for many years. For several days past the Democratic managers have feared some of the Senatorial as well as a number of the House districts were in danger of being lost by this lack of activity of the caras. The election was for half of the Senate (20) and the whole membership of the House of Delegates (100). In many counties the Republicans combined with the Populists and other anti-Democratic elements and made the issue on a cry of fairer elections.

Long before his death, Gen. Mahone advocated this issue and at a conference held in Petersburg last May there was adopted a so-called fair-election bill which it was proposed should be made the issue in this campaign. The indications are that in most sections of the State a small vote was polled. Ir, many of the black-belt counties, notably in the section of Norfolk, the negroes seem to have supported the Democratic candidate. The detailed returns, on today closed one of the most apa

AT THE NATIONAL CAPITAL. Intense Interest Displayed by the

People-The President's Bulletins. (REGULAR ASSOCIATED PRESS REPORT.) WASHINGTON, Nov. 5.—Owing to the unusual conditions prevailing in a number of States and the uncertainty regarding the outcome, intense interest existed at the Capital on the results of the elections. Particularly was this the case with respect to the elections in New York, Kentucky, Maryland, New Jersey and Ohio, and the returns from these States were awaited with the greatest interest. Great crowds gathered in front of the newspaper offices tonight and remained until the returns showed definite results at the storm centers. Others more fortunate visited various social and political clubs, where special arrangements had been made for obtaining the latest information. President Cleveland did not make his appearance at the White House at all today, but remained at his country home at Woodley. Private Secretary Thurber was on hand at the Executive Mansion, however, during the day and evening, and received bulletins that came over the special wire from the telegraph office. These were read by such of the Cabinet officers as gathered during the evening, and dispatches of special interest were telephoned to the President at Woodley. Three of the eight Cabinet officers, Secretaries Harmon, Lamont and Carlisle, had gone to their respective States to vote.

THE SENATORIAL ASPECT. WASHINGTON, Nov. 5 .- Great in, rest was manifested here in the legis-

lative elections throughout the country, as they will materially affect the control of the United States Senate. Up to today the standing in the Senate was as follows: Republicans, 42; Democrats, 35; Populists, 6; vacant, Democrats, 35; Populists, 6; vacant, Democrats will lose and the Republicans gain a Senator from Maryland and Ohlo respectively. The other legislative elections do not appear to affect the standing of the Senate, as Kentucky and Mississippl remain Democratic, the latter certainly, and the former probably, while lowa continues Republican.

Utah chooses two United States Senators for the first time, but the complexion of the Legislature is not yet certain. The Utah Senators take their seats in the Senate shortly after Congress assembles. The changes in Ohlo and Maryland will hot affect the Senate until March, 1897.

The Republican majority in the next Ohlo Legislature, as shown by the returns from Ohlo, insures the retirement of Senator Brice, a Democrat, and the succession of a Republican It appears to be settled that Ex-Gov. Foraker will be the choice of the Legislature, as the State convention placed his name in the platform as the Senatorial candidate

In Maryland the election of a Republican Legislature, the first in many years, will bring about the retirement of Senator Gibson and the election of a Republican in his place. As yet no names have been mentioned in connection with the succession.

The election of a Republican Legislature in lowa was not unexpected, and it is considered settled that Senator Allison will be elected to succeed, himself.

"Tammany triumphs in the first election after its tremendous overthrow.

The result is discouraging. It impeaches the capacity of the people for self-government. It shows that the voters are more susceptible to wrongs than intelligent as to remedy. Every consideration of decent politics, good government and the liberalizing of government and the liberalizing of sumptuary laws required the success of the reform ticket. One man's ob-stinacy, folly, and the unreasoning anstinacy, folly, and the unreasoning anger of the people have defeated it. The large Republican majority in the State will stand a monument to this sort of virtue that exploits itself in regulating the morals of other people. The wider political consequences of the result are grave. It means the strongest possible nomination by the Democrats for President and the hardest struggle in years as the basis of a hopeful campaign next year."

[COAST RECORD.] TAKES EXCEPTIONS.

GEN. DICKINSON ON THE TRIAL OF DURRANT.

Characters by the Prosecution Was Most Unfair,

He Will Move for a Rehearing When the Accused Comes Up for Sentence.

Gov. Budd Addresses the Fruit growers—A Shifting Heart and Appendicitis from Gum—Zante Currant Case.

(REGULAR ASSOCIATED PRESS REPORT.)

SAN FRANCISCO, Nov. 5.—Gen. Dickinson is busily engaged in the preparation of the bill of exceptions which is to be the basis of his motion for a new trial of Durrant for the mur-der of Blanche Lamont. He Intends paying a visit to his father at Port-land, and is desirous that the hearing be had at once, or that the hearing be had at once, or that the date for argument be set for such a time as will enable him to make the trip in the mean time. The motion for a new trial will be made when Durrant goes before Judge Murphy for sentence on Friday. Judge Murphy may decide to hear the argument at once or he may decide to argument at once or he may decide to pone it until after his vacation, as

postpone it until after his vacation, as he intends to take a rest before trying the Williams case.

There is a possibility, therefore, that the finale in the Lamont case, so far as the Superior Court is concerned, will not be reached for some weeks, but it is generally believed that Judge Murphy will be disposed to get rid of the Lamont case for good and all as soon as possible, for it is a foregone conclusion that the motion will be denied. Judge Murphy was exceedingly careful in his rulings and often gave the defense the benefit of the doubt rather than leave a loophole that would serve as good foundation for such a motion, which was, of course, anticipated.

Gen. Dickinson said that the defense is ready to proceed to trial in the Minnie Williams case at any time and intimated that he had a much stronger defense than was developed in the trial just ended. He said he was not sure that a change of venue would be asked, but from his recent expressions relative to the state of public opinion it is practically certain that such a procedure will be adopted. That a change of venue will be granted if asked is very probable, as it would be next to impossible to secure another jury here, and the District Attorney has announged that he will offer no opposition to such a motion. For these reasons there is very little likelihood that the Williams case will be tried in San Francisco.

Gen. Dickinson, in speaking of the Williams case.

sons there is very little likelihood that the Williams case will be tried in San Francisco.

Gen. Dickinson, in speaking of the Williams case, said: "I'll fight this thing to the end, you may believe me," indeating that he would carry Durrant's case or cases to the highest court in the land before he would yield up the Me of his client.

"Do you suppose we can get witnesses to testify for the defense," he said, "when they know that as soon as their identity is known something will be trumped up against them? Take that man Clark. He went voluntarily to Deuprey and told his story. He believed he was right, and he was right, but it was no sooner known that he was to testify for the defense than he was not testify for the defense than he was made out an embezzler and everything else that was black. It was all a lie. There was not a word of truth in it, but it kept him from telling what he knew. Lenihan was another instance, and so it went. I tell you the public mind was so prejudiced against the young man that those jurymen would not dare go home to their wives if they had not convicted him. Talk about a fair trial—there was never a more inhuman travesty on the term, and it was the same in this case. But I told you we were going to fight, and we will show you we mean it before we are through."

THE FRUIT-GROWERS

Meeting at Sacramento.

OREGULAR ASSOCIATED PRESS REPORTS SACRAMENTO, Nov. 5,-The Cali SACRAMENTO, Nov. 5.—The Callfornia Fruit-growers' Association met in the State Capitol today. President Cooper and George B. Katzenstein escorted Gov. Budd to the chair. The proceedings were opened by Rev. R. M. Stevenson of the Westminster Presbyterian Church of this city, with a prayer; in which he offered thanks for prayer, in which he offered thanks for "our system of government," and invoked blessings upon the Governor of State and the President of the United States.

Gov. Budd then addressed the con-

vention. He began by saying that he did not know whether the sudden call for an address from him was the result of a desire to punish him for having vetoed a certain bill during the last session of the Legislature or not, but the call had certainly taken him at a great disadventure and whelly unpresented. disadvantage and wholly unprepared. "In my mind," continued the Governor, "the fruit industry of the State of California will be one of the greatest industries of the near future. I am astonished, in traveling throughout the State to find in overy velley even in tonished, in traveling throughout the State, to find in every valley, even in the far North, as well as in the far South, and even in the foothills on the west of us, the fruit industry advancing every day."

The Governor next spoke of his recent visit to Alta, and the fine quality of apples and other fruit that could

ty of apples and other fruit that could be found there. But he was surprised to learn that the magnificent product of that section seldom reached the California markets. He learned that one man up there had received an order from Chicago for 5000 boxes, and when In Lincoln, Placer county, he learned that the entire crop of that section never saw a market in any part of this State. It was all shipped East.

He expressed the hope that the convention would consider what, if any, amendments should be made to the laws of the State for the advancement of the fruit industry.

"Personally," continued the Governor, "I am and have been opposed to ernor, "I am and have been opposed to commissions and to the expense of com-missions in matters of this kind, but I believe the State of California should establish, either under the guidance of some bureau or commission, if it has to be, what are known as quarantine officers, who will see that the pests from infected fruits are not brought into our territory."

The Governor suggested also that experts should be sent abroad for the purpose of inspecting pests and parasites, and obtaining them from foreign countries. The Governor then spoke warmly of the great possibilities in store for Sacramento by the utilization

store for Sacramento by the utilization of electric power, cheaply generated at Folsom and sent down to Sacramento by wire. It would make this one of the greatest cities in the United States he said. On motion of Maj. Weinstock of Sacramento a vote of thanks was tendered the Governor.

The address of welcome was then delivered by George B. Katzenstein. The annual address of President E. Wood Cooper was then delivered and referred to a committee consisting of D. T. stock were unanimously elected vice-presidents.

H. Weinstock, president of the Cali-fornia Fruit-growers' and Shippers' As-sociation, read a paper giving a history of the origin, development and work of the association, which he said had been of incalculable value to the fruit-grow-ers of California in preventing gluts, and in many other ways.

The afternoon session was taken up with a discussion as to the relative merits of the West Shore and the Erie raliroads, and the proposition to have a combined auction-house in New York city.

city. Ruter of Florin said that the shippers and agents cost the fruit-growers enough to build a railroad from San Francisco to Chicago. He advised the fruit-growers to do their own shipping. The Weinstock resolutions in favor of the one auction-house plan were uranimously adopted.

TWO PECULIAR CASES.

A Shifting Heart and Appendicities

ran, a man with a migratory heart, and a little girl who swallowed chewing gum and died from appendicitis are two unusual cases that have claimed the attention of the medical profession of this city for some time past. The former case is very rare, though not unknown to medical science, while a case similar to the latter has not been reported in the standard medical works of the day.

Frederick Moran is an Inmate of the County Hospital, and since he has been there his heart has been shifting from one side to another, and finally wound up on the right side of his body, where it seems to have located a claim with intent to remain permanently. Moran lived in Chicago when this peculiar action of the heart began. It was a restless, shifting organ, moving from side to side in a manner most perplexing and confusing to physicians. Moran found himself having considerable trouble, but he did not imagine that his heart was wandering around in this remarkable fashion.

When he came to this Coast he settled in Alameda, Here is heart began wandering from side to side, and this so disturbed Moran's internal arrangement that he became quite sick, He was sent to the county infirmary for treatment, and when he got there Resident Physician Clark made a thorough

wandering from side to side, and this so disturbed Moran's internal arrangement that he became quite sick, He was sent to the county infirmary for treatment, and when he got there Resident Physician Clark made a thorough examination of his physical condition. Dr. Clark noted that the heart seemed to be a little out of plumb, and he watched the case closely. While Moran remained in the infirmary his heart kept on its travels, and finally located itself permanently on the right side. During this time Moran suffered some, but Dr. Clark's treatment prevented any serious results. Moran became accustomed to the new order of things, and he is now discharged from the hospital and will go back to work. It is unusual that the heart should shift from one side to the other without causing death. Dr. Clark says that he has only heard of three similar cases, and that the shifting of the heart in Moran's case had been complete.

The death of Ora Lee Carlton, daughter of Mr. and Mrs. Charles E. Carlton of West Berkeley, is also a strange medical case. The little girl was but years old, but she had the chewing-gum habit. Her parents were careful not to allow her to get the gum if they could help it, but the little one often got a supply without their knowledge. Some days ago she was taken sick and it was difficult to tell exactly what was the matter. The sickness developed all the indications of appendictis, and then the little one said that she had been chewing some gum a few days before, and had accidentally swallowed it. An operation was performed, and the gum removed, but the little one did not survive the above and did the

ZANTE CURRANT CASE.

Appraiser Shurtleff of New York B

REGULAR ASSOCIATED PRESS REPORTA SAN FRANCISCO, Nov. 5 .- The tak ing of testimony in the Zante currant case began today before United States Appraiser Shurtleff of New York, who had been appointed referee by Circuit Judge McKenna. The contention is that the present tariff law provides for an import tax upon all currants brought here under the name of the Zante variety, whether they are really grown on that one of the Grecian isles

grown on that one of the Grecian isles or on others of the Archipelago, or even on the mainland.

Jones & Co., on the other hand, whose importation was levied upon against their protest, contend that the only currants which can be taxed under the law are those which actually come from the single island of Zante. In the contention they were supported

of that body that the local customs authorities have now taken an appeal to the United States Court.

Dr. Gustav Elsen, curator of the Academy of Sciences, and a practical scientist, gave his opinion that the term "Zante currants" commercially used, means the currants, or rather the grapes, grown on the Island, of Zante, throughout the Ionian Islands and on the mainland of Greece.

Prof. E. W. Hilgard also testified, and he, too, furnished lengthy explanations in regard to the origin, growth and habits of the Zante currant. He also appeared to consider that the term had a general significance, while at the same time he spoke of specialnames by which the product of particular isles and districts in Greece.

names by which the product of particular isles and districts in Greece were designated.

Torrey, of the firm of Torrey & Wheatman, greers, doing business in Oakland, testified that all currants, not domestic were recognized as Zante currants by grocers, and sold as such. Torrey said that he found no distinction between currants grown on the mainland of Greece and the Island of Zante.

Resolutions by the Chicago Press CIATED PRESS REPORT CHICAGO, Nov. 5.—At a memorial meeting in memory of Eugene Field, held at the Press Club today, the fullowing resolutions were adopted:
"The Press Club of Chicago desires

to express its sorrow over the death of Eugene Field. His was a nature rich in Eugene Field. His was a nature rearral those attributes which make a man of mark, compelling universal love and respect and admiration. In the death of Eugene Field the literary world has lost a man who in national and international appreciation had attained the widest distinction. Possessed of the national appreciation had attained the widest distinction. Possessed of the highest mental gifts, he was in his personal education the plainest of men. His perceptions were quick to distinguish between right and wrong in individuals and movements. He was clean, successful, brilliant, a perfect husband and father. His death is not the loss of his personal friends alone, but of Chicago and the world. He taught the good and taught it fascinatingly. He was as brave as the bravest in his opinions, and as gentle as a woman in his allowances toward those with whom he differed. Eugene Field's name will live in the degree in which the people loved. His love was that which never fails of reciprocity; his heart went out to that which most appeals to humanity—childhood. His name has won a place in every household, a place it will keen exhanges children pertite and a place in every household, a place is will keep as long as children prattle and mothers tell them tales."

Mr. Howland, M.P., president of the Deep Waterways Association, says that the American commissioners would prove admirably suited for their work. He was especially pleased with the nomination of Cooley, who, he said, is an engineer of great ability. He said this was the beginning of the most important work. Nothing is so far known as to whom the Canadian government will put upon the commission, but it is expected that the gentlemen selected will be Howland, one of the government's chief engineers, and some one other whose name has not yet been mentioned.

It Gets Beyond Control and Burns Through Several Large Blocks.

The New Manhattan Savings Institution Destroyed—Walls Fall in and an Explosion Occurs.

(REGULAR ASSOCIATED PRESS REPORTA NEW YORK, Nov. 5.—A fire started onight in Keep's shirt factory at Broadway and Bleeker streets, which extended to Crosby street and is estimated to have done damage of \$1,000,

mated to have done damage of \$1,000,-000. The comparatively new building of the Manhatian Savings Institution will be destroyed. Two other buildings were damaged by fire and water.

From this point where the fire was first seen, the flames ran quickly through the building, which extends from the corner of Crosby and Bleecker streets, through the 150-foot block until it makes the southeast corner of Broadway and Bleecker street. This building was destroyed. From this building the flames got into the structure adjoining on the south, while to the north they shot across the narrow Bleecker street, caught the enormous building of the Manhattan Savings Institution, the upper stories of which soon fell with a great crash, while the firemen were working on the lower floors.

Co., dealers in silks, and several like concerns.

Half an hour after the flames wers first seen in the Crosby-street side, the building had been demolished. The walls still stood erect, but the apertures where the windows had been, showed through them as a solid-sheet of flame. Notwithstanding the enormous heat the firemen crowded the building close-by. From the very first it was seen the building was doomed and the only chance was the saving of the near-by structures. An especial effort was made on the Bleecker-street side, to see that the flames did not cross the street to the eight-story Manhattan Bank structure.

the street to the eight-story Manhattan Bank structure.
Suddenly, a few minutes before 9 o'clock, where all had been light for blocks around from the glare of the flames, there came darkness. From the rent wall there came a great black cloud of smoke that blotted out all light and became so pungent in narrow Bleecker street that the fire-fighters were forced to run for their lives. Then the high walls parted, seemed to hang in the air for a moment, then fell where a few moments before the firemen had stood.

The five-story building to the south caught-fire with the falling of the walls and the firemen's attention was turned to that. Twenty of them were before this house when an explosion came that shook the building and every window in the houses were blown into the street. Iron shutters were forced from their fastenings and sent sailing through the air. It was at first thought that firemen had been injured by the wreck of this building, but when the first shock of the crash was over it was found otherwise. Two men who had stood near had been blown across the street, but were only slightly injured. The Manhattan building was just across the street, but efforts to save it were vain.

Fire Chief Reilly and twelve menwere on the sixth floor, but the flames came so rapidly that their escape was cut off. By cutting a hole through the side wall to the building to the north the chief and all of his men escaped. The twelfth man, Fireman Fitzgerald, crawled along a narrow coping, but became so weak that two comrades had to climb out of a window and lift him along the ledge, many feet above the

that Andrew Carnegle Will Give Another Million to the Art

PITTSBURGH (Pa.,) Nov. 5.-This was Pittsburgh's great day. lery with \$1,000,000, and also proposed erecting for the greater Pittsburgh free libraries at Duquesne, Carnegie and Homestead.

The dedicatory exercises took place in the music hall of the new building, which was packed to the walls by probably the most representative gathering ever seen in the Iron city. On behalf of the board of trustees, President W. N. Frew made the opening address, introducing Mr. Carnegie, who, in a brief address, formally turned over his magnificent gift to the people, delivering the keys into the custody of the trustees. In the course of his remarks he stated that he would give \$1,000,000 as an endowment fund to the art gallery, the interest to be used in the purchase of works of art, and that he would also erect libraries at Carnegie, Duquesne and Homestead.

Addresses by Gov. Hastings, on behalf of the commonwealth, and Mayor McKenna on behalf of the city, followed. The closing address was delivered by Congressman John Dalzell, At the conclusion of the exercises an informal reception was tendered Mr. and Mrs. Carnegie in the main room of the

THREATENING ASPECTS.

THE A.R.U. STRIKE MAY TET BE-

neapolis-No Freight Trains Moving-Unusual Activity on the

(REGULAR ASSOCIATED PRESS REPORT.) MINNEAPOLIS, Nov. 5.—There are ome threatening aspects in the Great orthern strike wituation which lead to the belief that the strike may be to the belief that the strike may be-come general among the A.R.U. men on this system by tomorrow. The dis-charge of Engineer William Best, hero of the Hinckley fire at West Superior, is very distasteful to the men. Best was president of the A.R.U. at that point and a member of the Grievance Committee.

DEVIL'S LAKE (N D) Nov 5-A special says that the strike went into effect at 2 o'clock this morning. Train No. 15, the fast freight, arrived this morning and is still standing on a side-track. Three engine crews responded to the call of the foreman, but so far no train crews have been secured. Only no train crews have been secured. Only a part of the employees are out. The City Council last night adopted a resolution declaring that in the case of a strike the company's property and its operation of trains would be protected at all hazards. This was wired to President Hill, in view of the fact that Devil's Lake was the strike center in the last strike. This is deemed significant.

THE SITUATION ON THIS COAST SAN FRANCISCO, November 5.—The threatened strike of the employees of the Great Northern Railway Comp has caused no little comment am local railway men and especially am the members of the American Rail Union. The dissatisfaction of the men has a peculiar significance in city, Oakland and Sacramento. I much as it is generally admitted

men has a peculiar significance in this city, Oakland and Sacramento, inasmuch as it is generally admitted that on the Great Northern railway system at this time hinges the future of all organized railway labor west of the Missouri River.

Incidentally it may be said that on the Southern Pacific railway system there has been unusual activity of late among the labor unions. Within the past month, it is officially declared by the local A.R.U. officers, nine lodges of that order have been successfully organized on the Pacific Coast. All this work has been effected through the instrumentality of James Hogan of Sait Lake City, who is the general western representative of Eugene Debs and one of the nominees for Congress in the coming election in Utah on the People's Party ticket.

Hogan, it is said, has three traveling delegates in this State who have reported to him that the American Railway Union sentiment is stronger than ever on this Coast, and have promised within three months to bring almost every railroad employee in California and Oregon into the camp before the new year.

NO FREIGHT-TRAINS MOVING. ST. PAUL, (Minn.,) Nov. 5.—A special from Devil's Lake, N. D., says that since the strike was ordered no freighttrains have departed and but one has
arrived. The latter was a limited one
from the East. Passenger-trains are
not interfered with.

Mayor Kelly and the City Council are
determined that no such disgraceful
scenes as were enacted in the last strike
shall occur. The business men generally
are provoked and disgusted with the
state of affairs. The elevators are full
to their capacities with wheat, and unless cars are furnished promptly they
will not be able to take in more grain,
which will cause a complete stagnation since the strike was ordered no freight-

will not be able to take in more grain, which will cause a complete stagnation in business and jobbers will quickly feel the effects, as country merchants will be unable to meet their obligations at maturity.

The strikers are quiet and orderly and have made no action toward interfering with their fellow employees. The men simply refuse to answer the calls. They seem to be determined.

will then be 120 feet by 24, with a capacity of 3000 boxes of lemons.
William Bowring, the San Dimas representative on the board of the Glen-

resentative on the board of the Glendora Citrus Association, reports that most of the orange-growers of his neighborhood have joined the association, and will ship their fruit through the new exchange.

N. W. Stowell has just finished the pipe system for the Azusa Irrigating Company, involving the expenditure of 3130,690 by that company within the last three years, in the completion of their irrigation facilities. This is a notable accomplishment for 170 men, and denotes a faith in the future, and a unity in the present that is refreshing. The land covered by this system is less than 4000 acres.

W. H. Adams and family have returned after a three-years' absence at Grass Valley.

All bids for the Baptist Church property were refused by the trustees yesterday evening, and the property readvertised for sale the 18th inst.

The recent rain and cool nights following are welcomed by the orange-growers, especially those raising early fruit. The sap will now cease growing, and the fruit color and mature. At Glendora the foothill oranges will be highly colored by the holidays, and much of it sold at extra prices.

The local G.A.R. post, Burnside, No. 174, has been brought to a condition of efficiency and of social enjoyment. About twenty-five of the "vets" are enrolled, with S. T. de Voin commander, and J. A. Helmuth, adjutant.

C. W. Dodsworth and wife returned yesterday from Cincinnati, where they have resided for the last few months.

The local paper at Covina reports the selling of a strip of land belonging to the "Mission farm," and facing the new depot grounds. It was purchased by the Southern Pacific Company, and the importance of the transaction is in the fact that it gives space for a new switch and room for an orange-packing house for the Citrus Association at Covina. The railway company will lease it to the fruit-growers for a term of years at a nominal rate.

Returns are not all in from yesterday's State elections as The Times goes to press. But they are sufficiently complete to show beyond a doubt that in nearly all States where elections were held the Republicans have won sweeping victories. There is glory all along the line, so to speak, and plenty

New York State, which is generally carried by the Democrats on the "off" years, when the issues are local rather than national, has this year been carried by the Republicans by a handsome plurality. The exact figures are still in doubt, but it seems probable that the Republican plurality in the State will reach 50,000, while it may considerably exceed those figures. Tammany has carried New York city by an average plurality of probably

Ohio gives the Republican ticket a plurality variously estimated at from 80,000 to 137,000. Even the minimum figures above given would constitute a magnificent victory. As the home of the next President, Ohio had a prestige to sustain, and she has royally sustained it. Hearty congratulations to Gov. McKinley are in order.

The indications are that even Mary land has gone Republican. Kentucky is still doubtful, with the chances favoring Hardin, the Democratic can didate for Governor. The Republican ho cannot enthuse over such results in States heretofore strongly Democratic is indeed stoical.

LOS ANGELES THEATER.-Th San Francisco News Letter was un gallant enough the other day to re christen christen "The Passing Show," which opened at the Los Angeles last night, opened at the Los Angeles last night, terming it "The Passe Show," but it was hardly a fair deal, for the most of it is fresh, lively, and up-to-date and its convolutions give fleeting glimpses of recent theatrical sucand its convolutions give fleeting glimpses of recent theatrical successes, (operas, and what not) that are clever and entertaining. Of course it does not aim to do more than amuse, for its shadow of a plot is so diaphanous that the term is a misnomer, but it is breezy, snappy and gay from start to finish, and the fine audience which gave it greeting last night was ready with the glad hand. Every-body got a rally, and some of its features made great big hits, particularly Lucy Daly, who is about the most supple, lithe, cyclonic little midget of a woman that ever danced, flounted and careened her merry way into the good graces of an audience. She is down on the bills as "a bit of dancing sunshine," and is every inch of it. Graceful, piquant, abubble with vivacity, rollicking with mirth and as volatile as a ripple of laughter, she took the house by storm and gained by her witchery of motion and her breeziness of style volleys of applause that made the horseshoe loops in the incandescents quiver with delight. Every thing she undertakes is full of joility, but her appearance with her company of pickaninnies capped the climax of furious fun. Dance the little, nigs never so nimbly her lively feet outdid every one of their pigeon-wings, and, taken altogether, she is the most consummate artist in her way ever seen here. John E. Henshaw, as the amusement caterer of the Dawdle Club (which, by the way, is an immensely funny travesty on the New York Vaudeville Club, has an off-hand manner that is as fetching as are his dimples. His announcements of the various features of his "greatest show on earth" are worth going miles to see. John D. Gilbert did numerous neat bits of comedy work in his monologue, evincing natural talent as a fun-maker of no mean order. Vernona Jarbeau played with much of her old fire, and when garbed in fleshings disclosed the same shapely figure that has intoxicated the senses of so many front rows of bald heads in years agone. Time, the iconoclast, shows the touch of his relentless fingers in the lines of her handsome face, but those from the neck to the toes of her slippers are as rich in graceful curves as they ever were. Her imitation of Mme. Caive in "Carmen" was an excellent bit of mimicry. Cheridah Simpson is a young woman with a fresh beauty, a rather sweet voice and a most engaging and picturesque stage presence. His make-up as the main guy of "Shore Acres" was particularly good. Gus, Pixley's tramp is still as ragged and worthless as ever and still whistles up the same old tune with a twist of the back and of the lip that is inimitable. Of course the audience couldn't get enough of that—it never can. Madge Lessing as Hannele, the young woman who sees spooks and things and acts as impressario of the living-picture show, was very good. The travesties on the plays of the day, "Trilby." "The Butterflies," "Sowing the Wind," etc., etc., were all clever take-offs, and the dancing of L'enfant prodigue—the Misses Prager, Maynard, Carlisle, Hove, Lear, Robinson and the Witt sisters—was a most engaging divertities." COMING ATTRACTION.—Jolly Joe Cawthorn and his big comedy company in "A Fool for Luck" is the newest big venture in the Larce-comedy field, and it comes to the Los Angeles Theater Monday and Tuesday nights, November II and 12. It is put forth by John W. Dunne of Patti Rosa fame, and in view of this fact its appearance in this city will be an event of extraordinary interest to fun-loving play-goers. The comedy is in three acts, which are said to be crowded with funny situations, laughable speeches, amusing incidents, catchy songs, dances, and the most novel specialities imaginable. This is a thing of such magnitude that it becames an important matter of commerce, and it materially affects the balance of trade. It is a one-sided affair, this country getting nothing in return for the expenditures. European nations have a lot of titles to sell which are of no use to them.

The "poor man," or the laboring class is the backbone of the nation, and no town can be permanently prosperous that does not recognize this fact. They are the great producers. Business men keenly realize the disadvantages that would result from a protracted campaign. Three months is long enough. In fact, could a vote of the business men of the country be taken now, there is no doubt that there would be an overwhelming majority in favor of cutting the canvass down to sixty days.

Devoted to Her Home and the Edu-

cation of Her Children.

Mrs. Sheridan is still a young woman, writes V. Stuart Mosby Coleman from Washington, D. C., in November Ladies' Home Journal, She is slender, almost girlish in figure, and dresses with exquisite taste in dark colors. She is graceful and willowy, and carries her dainty head with an air of aristocratic ease. Her dark hair waves slightly into a becoming bang, her'eyes are brown and bright while the contour of her face is a delicate oval. In manner she is simple and kindly, her birth and breeding showing plainly in the ease with which she meets all of her social duties and the tact of her cordial bearing. Mrs. Sheridan is rather retiring, and is devoted to her home and children. She orders the conduct of her household, even to the details, and personally superintends the studies of her son, who bears the name of his fillustrious father, of whom he is a speaking likeness. She finds time, also, to indulge her tastes for music and painting, for fancy needlework, and for the demands of charities. Until within a year or two Mrs. Sheridan has entertained rarely, except in the way of small dinner-parties and informal evenings for friends.

The Sheridan children are a bright and interesting group. There are four of them: Mary, the eldest, who was presented to society last winter; the sheridan children are a bright and interesting group. There are four of them: Mary, the eldest, who was presented to society last winter; the scoil debut during the present season, and Phil, Jr., who is nearing his fourteenth birthday. The girls are just such daughters as might be expected of such a mother; pleasant, affable, well-mannered, well-educated, sweet and simple; full of life and spirit. In young Phil great hopes are centered. He goes to school in Washington, but when he is old enough his mother will have him sent to West Point.

MAN WHO HOBNORS WITH THE POLITICAL "BIG UNS."

The Secretary of the National Republican Committee, Joe Manley, Talks of the Presidential Possi-bilities and the Political Outlook Generally.

Perhaps the man in Los Angeles ed in the election returns that interested in the election returns that came ticking over the wires from the East last evening, was the secretary of the Republican National Committee, Joe Manley of Maine, who sat ensconced in a luxurious room at the Westminster, while the good news from New York, Maryland and the rest was prought to him.

New York, Maryland and the rest was brought to him.

En route from the northern part of the State to his home in New England, Mr. Manley has tarried for a few days in Los Angeles and to a Times re-

Mr. Manley has tarried for a few days in Los Angeles and to a Times reporter, last evening, chatted pleasantly of matters pertaining to national politics—and other things.

With becoming reluctance Mr. Manley hesitated to discuss the plans and prospects of Republican Presidential candidates, but under the pressure of invitation, said there are practically but three candidates for the Presidential office—McKinley, Reed and Allison.

"And you are supporting?"—

"Reed, of course," promptly answered Mr. Manley.

"And what of Harrison?"

"Mr. Harrison is not and cannot, strictly speaking, become a candidate for the nomination," said the secretary, "for the reason that an ex-President is, by public sentiment, barred from participating in the scramble and hustle for office that is conceded to be legitimate in those who have never been the chief magistrate of the mation, Of course, if the nomination was tendered, with practical unanimity, in the convention to Mr. Harrison, he would be at liberty to, and doubtless would, accept it—with alacrity. But he cannot be considered a 'candidate' for the nomination."

"How about Sherman—and Morton?"

"Oh! don't think of Sherman for a minute," quickly replied Mr. Manley. "Sherman is over 70 years old and the support of his State is pledged to McKinley. Morton? Well—Morton is over 70, too, but he would undoubtedly be able to command the vote of the New York delegation, in the convention, but it would be only a complimentary vote. "Then Reed is considered to have the support of what you would call 'the East?" asked the Times representative.

"Now you touch upon a point which I do not wish to discuss—in detail." re-

East?" asked the Times representative.
"Now you touch upon a point while.
I do not wish to discuss—in detail," replied Mr. Manley, in courteous tones.
"But I will say that, at the proper
time, the Eastern vote will be solid
for the man from Maine. Reed will
have this advantage over the candidates I have named: His name has
never yet gone before a convention,
while Allison is an old-timer, and McKinley is not altogether a virgin, in
this respect. The mention of Mr. Reed's
name will arouse an enthusiasm that

never yet gone before a convention, while Allison is an old-timer, and Mc-Kinley is not altogether a virgin, in this respect. The mention of Mr. Reed's name will arouse an enthusiasm that could never be evoked if he had been once or twice or thrice before the people as a Presidential candilidate."

"Allison is a good man—a strong man, and he will be able to command a sturdy following. Its strength at this time is a mere matter of conjecture, and cannot be even approximately estimated. In fact," said Mr. Manley, as if deprecating further discussion of the matter, "it's entirely premature, this talk of candidates, and the possibilities of their success. Things are in a chaotic, embryotic state just now, and 'hey will be until next winter when Congress meets and the leaders of both sides get together and come to mutual understandings in the matter. Then public sentiment can be expressed, as it is impossible to have it now, and everything connected with the subject will be thoroughly ventilated.

"Of course I regard a victory for the Republican party in the next rational election as certain, unless, in the coming Congressional session, the party cuts its own throat, as the Democrats succeeded in doing while in control of the government. But that's a contingency I do not expect to occur. I take it that the results of the elections held today are significant of the victory that Republicanism will be crowned with in the next Presidential campaign."

Mr. Manley has visited San Francisco, and is inclined to favor the claims of that city for the National Republican Convention next year. He expressed himself as believing that all the obstacles, save the one cited by The Times, in the way of San Francisco, and is inclined to favor the claims of the convention news across the continent. "If I am not mistaken," said Mr. Manley, "there are but twelve wires from San Francisco east, while we found seventy-two none too many for our use in Minneapolis. That will be the chief, and perhaps the insuperable difficulty connected with

convention will be held during July or August."

Mr. Manley is far more inclined to discuss the beauties of Los Angeles, her homes and evident business prosperity, than the intricate maze of national politics. His delight in the tropical verdure so profuse in Los Angeles and the surrounding country is enthusiastic and unaffected. Expecting to find Los Angeles but a semi-developed winter resort, he was amazed, so he find Los Angeles but a semi-developed winter resort, he was amazed, so he avers, at seeing the solid, substantial evidences of commercial wealth and business enterprise visible on every hand in this city. Lavish in his praise of all that he has seen is Mr. Manley, and profuse in his eulogies of the distinctively California features of Los Angeles. For a few days the secretary of the National Committee will linger in this sunny southland, and from thence journey to his home in New England.

THOMAS CAMP.

Very Rich Mining District Near

YUMA (Ariz.,) Nov. 4 .- (Special Correspondence.) W. J. Sheridan, a well-known mining expert, has just returned from the famous Thomas Camp, located twenty miles southeast from here, a find of last spring. He, like all other mining engineers of standing, is very conservative, and his opinion is, therefore, of unusual value. He says this is the "fin de siecle find;"

that La Fortuna mine, bonded to C D. Lane of Hayward, Hobert & Lane of Angels' Camp, Cal., is now opened up by a 130-foot shaft, showing an immense body of free-milling gold cre, running from \$50 to \$100 per ton. The bond is for \$150,000, due next February.

Mr. Sheridan says the mines and prosects of the camp are very promising: Mr. Sheridan says the mines and prospects of the camp are very promising; that the lack of water prevents owners of other promising claims, who are all poor prospectors, from prosecuting work on their properties. They are forced to wait until Mr. Lane puts in a pumping plant to supply the camp and the mill he contemplates erecting in the near future, with water.

Mr. Lane was at the camp last week. He was greatly pleased, and made a payment on his bond of a few thousand dollars.

Blankets and Comforts at special prices this week-75c, \$1.00 for good large-size blankets. \$1.25, \$1.50, \$1.75 and \$2.00; better blankets you never

saw for the money. \$2.50, \$3.00, \$3.50 and \$4.00 for extra large fine blan-

kets. Four of the best sellers in the house. The cool nights makes brisker buying. Cotton Comforts, filled with the best quality Pure White Cotton, \$1.25 and \$1.50. Extra-large-sized Comforts, lined with a single piece of fine fluffy white cotton, made expressly for these comforts, \$2.50, \$3.00 and \$3.50; better than any cheap down you ever saw. One great trouble with a cheap down comfort, the down works out of the comforts and flies all over the room. These fine soft comforts will not do this. The outside is made of either fine silkolene or extra quality of French satteen and are the best things ever offered in

cotton-filled comforts. New Linens today. Napkins from 40c a dozen up. Tablecloths from \$1.00 and up. Stand Covers, 50c and up. Special values in Crash Towelings, 10c, 122c and 15c a yard. Really worth one-third more money. These prices are made to help the domestic department largely increase sales. Don't expect these figures to last. It is one of the impossibles. HISTORICAL SOCIETY.

Recent Origin of Man-Life of Don Alfredo Robinson.

Alfredo Robinson.

The Historical Society met Monday evening in Judge Morrison's courbroom. There was a good attendance of members and visiters. The secretary, J. M. Gumm. read a communication from Peyton Boyle, of the West Publishing Company of St. Paul, Minn. making inquiry for some biographical data of Hon. J. M. Jones, who was judge of the United States District Court of Southern California from 1850 to 1854; also a letter from Miss Picher of the Pasadena Loan Association, making inquiries in regard to the Camina Real, or King's Highway, a royal road that formerly connected the different missions.

or Aing's Highway, a royal road that formerly connected the different missions.

Dr. Stephen Bowers read a valuable paper on the "Recent Origin of Man." He instanced the finding of the so-called missing link, by a Columbia College professor, in the mountains of Colorado, and the discovery of the famous Calaveras skull beneath the pilocene strata, where it had been placed by the miners to deceive the Geologist Whitney, as illustrations of fakes, upon which theories of the existence of prehistoric man are built. The doctor gave it as his opinion that man's existence on the earth does not exceed that given in Usher's Chronology, about six thousand years.

H. D. Barrows read a short paper on the "Life of Don Alfredo Robinson." At the time of his death, October 19, 1895, Mr. Robinson had been a resident of California sixty-six years. He came to California in 1823, and engaged in trade. In 1846 he published, anonymously, a book on life in California. This book is regarded as a standard work on California life and customs before the American occupation. Mr. Robinson was for many years the agent of the Stearns Rancho Company, of this county. He was a man highly respected by all who knew him.

Revivalist Romig.

Last evening Evangelist Romig preached to a good audience at the First Christian Church upon "Jesus as the Great Physician," basing his sermon upon the instance of the lifting up of the serpant in the wilderness. It was a powerful and impressive sermon and made a profound impression upon those present. The meeting is growing in attendance and interest.

IN SOCIAL SPHERES.

The whist party given last evening by Mr. and Mrs. John L. Jones, at their lovely home on Portland street, was an exceedingly delightful affair. There were fifteen tables, the booby table being considerately hidden by a tall screen covered with pepper sprays and red chrysanthemums. The ladies' first prize, a graceful vase, was won by Mrs. Mercer, and the second, a large china plate, by Mrs. Kate Taylor. Both of these prizes were exquisitely decorated by Mrs. Bancroft, as was also the gentleman's first prize, a china clock, which was won by S. B. Caswell. The second, a bronze bust of Beethoven, was won by C. C. Carpenter. The talles were small cornucopies of roughpaper, the ladies' pink and the gentlemen's lavender. Tiny chips were used as markers.

The rooms were effectively decorated, the front drawing-room with quantities of yellow chrysanthemums, and the back with roses and white chrysanthemums which overflowed huge bowls. In the reception-room, La France roses and smilax were arranged artistically about the plano, and a tall pink satsuma jar was filled with a mass of white chrysanthemums were used elsewhere about the room. In the reception hall pink and white carnations and potted maidenhair ferns were prettily arranged, and over one of the doors hung a portiere of smilax, caught with white chrysanthemums. A mandolin orchestra, stationed in a turn in the stairway, rendered delightful music during the evening. A large bowl of delicious punch was placed in a cozy alcove, on a table piled high with tempting fruit. Mrs. Jones looked very queenly in an elegant creation of pale blue silk crepe, with garniture of narrow valenciennes lace and white satin ribbon; a bertha of exquisite pearl passementeric finished the bodice, and the butterfly sleeves were also trimmed with the pearls and lace. The guests were Mr. and Mrs. Gred Homes, Mr. and Mrs. George Monigomery, Mr. and Mrs. Ross, Mr. and Mrs. Fred Griffith, Mr. and Mrs. T. J. Fleming, Mr. and Mrs. John Wigmore, Mr. and Mrs. John Wigmore, Mr. and Mrs. John Wigmor

Y.W.C.A. ENTERTAINMENT. A programme, which, with the ex-eption of one number, was thoroughly lelightful, was given at the Y.M.C.A. ception of one number, was thoroughly delightful, was given at the Y.M.C.A. Auditorlum last evening, for the benefit of the Y.W.C.A. The Krauss Quartette gave an "allegro con brio" by William Langhaus, a Reverie by Schumann, and "A la Hongroise" by Fr. Schubert. Their musicianly, conscientious playing is always a delight. Miss Katherine Graham, the new assistant in the Cumnock School of Oratory, made her first appearance in public in this city last evening, and recited the "Ballad of the Brook," by Charles Roberts; "The Little Evangelist," by H. B. Stowe, and "The Corpse's Husband." Miss Graham has an attractive personality, is charmingly free from affectation, and reads very pleasingly. Miss Addie L. Murphy, whose time is so filled that her name seldom appears now upon a programme, greatly to the regret of her many friends, read from "Christle Johnstone" by Charles Reade, and in response to a hearty encore, gave "Widder Doodles," by "Josiah Allen's Wife." Miss Murphy's rich, sweet voice, her excellent methods and her gree make her reading most delightful. Arnold Krauss gave an excellent rendering of Vieuxtemps's "Fantasie Caprice." rendering of Vieuxtemps's Caprice."

The one flaw in the programme was Dr. Justin Kay Soles of London, who sang "Heart's Delight," by Gilchrist. It is to be hoped that he is a better doctor than singer, else his patients are to be pitied, for he sang atrociously. At his second number, he appeared, and, with charming ingeniousness, laid the blame on the piano, and announced to the audience that he would not inflict anything more on their "auditory nerves," at which they all seemed relieved. Even allowing for the piano being out of tune, it could scarcely account for the lack of cultivation and expression apparent in his singing. The Krauss Quartette came to the rescue with a very delightful rendering of Rode's "Air Varie."

The stage was decorated with striped cane, festoons of smilax and masses one flaw in the programme was cane, festoons of smilax and mass of chrysanthemums.

Made in Stutgart

PER GARMENT.

Today we place on sale 100 dozen of the famous Stuttgart Normal Sanitary Woolen Underwear. These goods usually retail at from \$2.50 to \$3.00 per garment, but in order to place them on the market we have made the price \$1.40 for all sizes.

Stuttgart Underwear is made of the finest and purest wool, unmixed with cotton or linen fiber and of its natural color, so that it is free from any injurious dye.

These goods are made to open in front or on the shoulder, and being of soft and elastic texture afford a ready exit for all cutaneous exhalations. They are strongly recommended by the British, French and German Medical Journals, both for those who are young, robust and vigorous and also for those who are aged, infirm or of languid circulation. They are skillfully fashioned on the frames of anatomical principles, insuring a good fit and are free from the clumsy and often irritating seams found in sanitary wool underclothing of foreign manufacture. See that the name is stamped on every garment

At the Courthouse yesterday the excitement over the cattle-stealing case and the charges of perjury arising out of it, was on the steady increase. The Mayne case was continued until Thursday. The Hart boys presented their side of the quarrel over the Natick House lease, and Mrs. Bernard stepped into the case with a complaint in ejectment. An Increase in Officers to be Re-

nuested of the Council. Chief Glass before the Police Com-mission yesterday informed the mem-bers of that body that the present poin point of numbers is the Los Angele polloe department to those of Eastern cities which have not a larger popula-tion than this city. Atlanta, with a population of 125,000, has a police force population of 125,000, has a police force numbering 225 men, while there are but eighty men at the disposal of Chief Glass, this number including jailors, patrol drivers, clerks, bailinf, etc. The Chief declared it to be an impossibility to cover the whole city and afford adequate protection with the small number of men now employed. The territory recently gained by annexation, has increased the difficulties of an already serious wituation.

increased the difficulties of an already serious wituation.

The Commissioners, after listening to the Chief's remarks, expressed themselves as in hearty sympathy wit hthe idea of strengthening the department by adding to its numbers, but assured the Chief, what he already knew, that the power to take such action as desired by the chief is not vested in the Bolice Commission, but in the City Council. A committee was appointed, however, consisting of Commissioners Wirsching and Long, to confer with the Finance Committee of the Council, regarding the possibility of adding to the force of men now acting as guardians of the municipal peace.

Several months ago Chief Glass made a visit to San Francisco, and while there was so impressed with the neat ness of the metropolitan police force that since his return to Los Angeles he has made a number of attempts to improve the looks of the men under his care. His latest idea was indorsed by the Pelice Commission yesterday, the same being none other than to have the police officers equipped with regulation caps and helmets, which will be appropriate to the present season. They will displace the natty, light-colored helmets which the policemen have worn as summer head-gear. The Chief was instructed to see that the men are provided with the new helmets at as early a date as possible.

Complaint was made to the Commissioners yesterday by 0. T. Johnson, of the nuisance created in the rear of the Hotel Westminster, by the horde of newsboys who secure copies of an evening paper in the alley back of the hotel. The same complaint has been made before, without relief having been secured. The Chief promised to give the

The applications of John L. Barnett and N. Hausen for appointment as police officers were received and filed.

The question of requiring the salvon at Sycamore Grove to take out a city license was discussed by the Commissioners, the point being raised that as the proprietor was in possession of a county license before Highland Park was annexed, it might be necessary to wait until such license had expired before requiring the payment of actity

wast until such license had expired before requiring the payment of arcity license. This point, however, was not considered a good one, and the City Clerk was instructed to collect the license fee ordinarily paid by liquor dealers within the city limits.

The following applications for liquor licenses were received and referred to the Chief: Felix Viole, No. 402 East Fifth street; Robert Kern, No. 105 South Spring street; Steinike & De Fries, No. 223 West Third street; J. M. Smith, No. 119 North Alameda street. The application of P. Slatri for a license at No. 216 Bellevue avenue, and No. 556 New High street, was granted.

A LACK OF FUNDS.

Public Improvements Suffer from a

At this present moment the city of Los Angeles is in as puzzling a finan-cial predicament as could well be imag-ined. There is prosperity galore in Los Angeles and every department of business life bristles with vitality and is

Angeles and every department of business life bristles with vitality and is instinct with vigor; but in spite of this glorious run of financial good luck, the municipal treasury is short—very short, and the funds are so low that a number of needed public improvements must be either materially curtailed or dispensed with entirely.

The biggest problem that demands solution at this moment is, how the new city jail is to be built, when there is but \$58,000 available for the purpose, and the lowest bid received for the work was about \$100,000. The Councilmen swear that not a cent above the \$58,000 can be obtained, and the Ruilding Superintendent, who drew the plans and prepared the specifications, is equally forcible in saying that the bid of \$100,000 is very reasonable, and to expect the construction of the building for a smaller sum is to expect what will access. expect the construction of the building for a smaller sum is to expect what

will not occur.

And there you are.

The Building Committee of the Council will meet this morning to discuss the proposition, and wrestle with the acknowledged difficulties of the situation. Of course the committeemen will scheme to cheapen the building in every possible way and already some queer proposals on this line have been ad-

vanced by various members of the Council. One is to make the front of the building with a brick surface, rather than to use granite or sandstone for the purpose. Another is to use brick instead of cement in the basement and for the foundations and pillars. Again it is proposed to erect the frame of the building, according to the plans drawn, and defer the construction of the interior furnishings until additional funds can be secured. These and other schemes will engage the attention of the Councilmen this morning when they meet in consultation with the Building Superintendent to discuss the main proposition.

ANOTHER NUT TO CRACK. But this is not all that is worrying the municipal statesmen these lovely autumn days. Within the very precincts of the City Hall there exists a condition of affairs that is remarkable and even extraordinary, in some respects. From basement to garret, through almost every office in the noble building, the Health Officer has passed and with the magic wand of his authority has caused to be closed nearly all the lavatories, closets and sinks in the building. This action was not taken without abundant justification. For months the City Hall had been a nest of foul-smelling, disease-breeding. the building. This action was not taken without abundant justification. For months the City Hall had been a nest of foul-smelling, disease-breeding, death-provoking odors. Odors that assaulted one in the corridors, challenged attention in the offices and made their nasty presence so conspicuous as to render existence in the City Hall a burdensome nuisance. It was in simple compliance with the duties of his office that Dr. Steddom shut the closets in the building, so that at present the sanitary conveniences in the City Hall are about as ample and luxurious as were those enjoyed by the Egyptians on their way to the promised land.

So the Building Superintendent was instructed to prepare specifications for the repairing of the plumbing throughout the hall; the specifications were submitted, were referred to the Sewer Committee, recommended by that body to the Council, bids advertised for upon the specifications, bids received, bids referred to the Sewer Committee and reported by that body to be too high, and at present the building stands a bankup repository of ill-concealed nuisances, and a structure almost totally lacking in even the simplest sanitary fixtures. And the City Council looks pitifully at

and a structure almost totally lacking in even the simplest sanitary fixtures. And the City Council looks pitifully at the admittedly horrible condition of the buildings, and contends aganist remedying the difficulty with the same old argument—lack of funds. And it would require the prognosticating powers of a seventh son to predict when the building will be placed in even a semi-decent and half-way sanitary condition. So distressed are the Councilmen over the lack of funds in the city treasury that it is seriously proposed to close the public library a half hour earlier in

ury that it is seriously proposed to cl the public library a half hour earlier the evening, to the end that the monthly gas bill of the City Hall may be curtailed to the extent of a few

be curtailed to the extent of a few dollars.

What the feelings of the Councilmen will be when the Police Commissioners wait upon them in a few days and ask that a few dozen more policemen be appointed, at an expense of \$100 a month, can be better imagined than described. Meanwhile, any Napoleon of finance, out of a job, who will descend upon the city Solons with a key to the financial situation will be assured of a warm welcome at the hands of the municipal councillors.

Lawn's Confession.

Mace Mayes was ordered into the custody of the Sheriff yesterday by Judge McKinley, as the fight between the law-abiding citizens and the band of cattle-thieves in Antelope Valley is growing so hot and strong that it was deemed no longer safe to leave the ring-leader of the gang at large with only

leader of the gang at large with only a bond to prevent his making a sudden break for the mountains.

Nearly all of Lancaster is hanging around the corridors of the Courthouse, for the adherents of Macc Mayes have rallied to his banner for a last stand against the law, and the ranchers and cattlemen who have suffered from the depredations of the freebooters are equally organized and quite as determined in their effort to effect the final break-up of the gang.

No less than 125 witnesses have been summoned in the case, and the District Attorney's office has begun to make havoc with those who are suspected of swearing falsely. The Sheriff's men are still scouring the country for George Smith, who succeeded in effecting his escape, and such is the desperation of the defense that Mayes's attorneys have requested to have Smith's evidence stricken out, as being entirely unreliable.

Accordingly District Attorney Donnell was summoned, and Lawn was taken into the Sheriff's office, where he made the following sworn statement:

"On or about the 24th of October, 1856, Dick Vanderkarr subpoenaed me as a witness for the defendant in the case of the people against Mace A. Mayes, charged with grand larceny, and the same day he subpoenaed George Smith; after and on the same day I went with Dick Vanderkarr to Santa Paula, and on the way to Santa Paula Dick Vanderkarr told me to swear that I saw George Vanderkarr on the 11th day of June, 1895, at R. I told him that I would swear as he wished me to, but at the same time I did not know where George Vanderkarr was on the said lith day of June, 1895. I would not have sworn as I did if he had not persuaded me to.

"On Tuesday morning about the 29th of October, 1895, before the case against Mace A. Mayes was called for trial, I had another conversation with Dick Vanderkarr at the Junction of Spring and Temple streets, Los Angeles, and he told me as we rode to Santa Paula as above stated. He was very earnest in persuading me, and repeated it over several times, so that I would make no mistake as to the date. What he said to me he also said to George Smith at the same time and place, in my presence. I would be willing to correct my testimony in the case now on trial, but I am afraid of Mace A

At this revelation, it was decided that Dick Vanderkarr would be more useful inside the County Jail than suborning witnesses by bribery or intimidation out in the corridor of the court, and a warrant for his arrest on a charge of subornation for perjury was promptly issued, and carried into effect by Sheriff Burr, who arrested the enterprising witness-broker at noon. was promited in the state of the enterprising witness-broker at noon. The testimony of five more witnesses for the defense has been impeached, including that of the defendant himself, and John C. Hanna, Charles Seabright, and John C. Hanna, Charles Seabright, Albert Reed and a Frenchman named Bucetti may well be doubtful of what another day may bring forth.

It is claimed that Mayes ruled the rougher element in Antelope Valley with a rod of iron, and that many dare not testify against him. While deputy sheriff, it is alleged, he protected many queer characters, and shielded some decidedly crooked dealings, and he now claims his reward in testimony gotten

up to order for his benefit.

A large number of the substantial

A large number of the substantial ranchers and cattlemen of the valley have come down, determined to see the case through, and to spare no pains in effecting the complete annihilation of a gang which has been the terror of the country for years.

It is estimated that Mayes and Vanderkarr, with their accomplices, have stolen over 2000 head of cattle in the last three years, the value of the stock amounting to nearly \$60,000. Vanderkarr had a butcher shop where many beeves were killed, but no hides were ever sold, and the gang carried on the business of shipping beef all the way to the Needles. The ranchers have had enough of this, and have organized in their turn to rid the country of the enough of this, and have organized in their turn to rid the country of this plague, and so protect their herds. There is much excitement among the

There is much excitement among the witnesses for the defense, for the everyigilant Con Mallory has embodied in himself a whole corps of detectives, and has the whole case so thoroughly at his finger-tips that he knows exactly where to strike. Assistant Dist.-Atty. Williams is pushing the matter to a close, but the row may involve the major part of Antelope Valley before it is finished.

THE MAYNE CASE. A Continuance Granted Till Thurs

day Morning.

The trial of Clifton E. Mayne on a

charge of criminally assaulting Elsie Shipton, the fourteen-year-old daughter of Mrs. Clara E. Shipton of San Francisco, was set for yesterday morning in Department One, but was continued on account of the sickness of the defend-ant's leading counsel, J. L. Copeland of

San Diego.

When Judge Smith called the case in Department One of the Superior Court, Attorney J. Murphy of San Diego rose and moved for a continuance on two grounds the sickness of Attorney Coneland, and the absence of witnesses ma-terial to the defense. Mr. Murphy said

land, and the absence of witnesses material to the defense. Mr. Murphy said that Mr. Copeland had been taken suddenly ill on Sunday, and was tinable to leave the Nadeau Hotel. His physician had ordered the attorney to remain indoors until he recovered.

On the second ground for his motion, Mr. Murphy was fortified by an affidavit, signed by the defendant, setting forth, in substance, that Nora and Ella Blosser of Marcus, Iowa, had lived in Iowa during 1879, 1880 and 1881, and were acquainted with Mrs. Shipton; that they would testify that Elsie Shipton was born in 1879, and was over 15 years of age on March 30, 1895; that the records of the Health Office of Dubuque, Iowa, would show that there was born to Mrs. Shipton in 1879 a girl, which girl was not Elsie. It is said, further, that the afflant was looking for the physician who delivered Mrs. Shipton of Elsie, and that the depositions of the physician who delivered Mrs. Shipton of Elsie, and that the depositions of the physician and others acquainted with the circumstances of Elsie's birth would be procured. The defendant cleimed that he had no money to make a proper defense, but would soon be in a position to secure the attendance of the Elosser girls.

Deputy District Attorneys Holton and

Deputy District Attorneys Holton and McComas resisted the motion, and contended that Mr. Murphy should attend to the matter in the absence of Mr. Copeland.

In commenting on the affidavit Judge Smith said: "This looks like a put-up

Mr. McOmas suggested that there was noting before the court to show that Mr. Copeland was really sick. The court ordered an adjournment till 2 o'clock a that Mr. Murphy could secure the affidavit of Mr. Copeland concerning its sickness.

When court reconvened Mr. Murphy was largily in evidence with three affidavits, the first signed by the defendant, the second by Mr. Copeland, and the third by himself. The gist of the defendant's affidavit was that Mr. Copeland and the hind by himself. The gist of the defendant affidavit was that Mr. Copeland stated in his affidavit that he had exclusive control of the defense, was the only astorney who knew the theory upon which the defense would is made, and that this theory could mt safely be imparted to any other autorney.

Mr. NcComas presented a counter-affidavit to the affidavit read by Mr. Murphy in the morning. Mr. Murphy in the morning. Mr. Murphy should so ahead with the case in the absence of Mr. Copeland, as he had been in the case as counsel almost from the start.

The court was inclined to be accommodating, however, and continued the case till tomorrow morning, with a gentle hint to Mr. Murphy that, if Mr. Copeland did not recover in the mean time, Mr. Murphy would be expected to sit up a little later of rights to except

MRS. RERYARD INTERVENES. Another Development in the Natick-

complaint, in which their side of the story is fully set forth, and a complaint in ejectment was filed by the Bernard family, who have begun suit against Mrs. Seighold for restitution of premises and for \$100\$ damages.

The answer of George and Dwight Hart to the suit filed by Mrs. Seighold sets forth that their father, just before his death, distributed his property between his wife and his two sons, to prevent the necessity of its being taken into the Probate Court. Mrs. Hart received the deed of nineteen acres of land near Glendale, valued at \$4000, and, in addition to this, her dying husband counted out \$3000 in money, which he gave her, and executed a bill of sale of all the furnishings of the Natick House, which were thus equally divided between the three heirs.

In the partnership which was then formed between Mrs. Hart and her stepsons, each held a one-third interest. The accounts were settled every month, and Mrs. Hart received her third share of the profits. She had access to the

The accounts were settled every month, and Mrs. Hart received her third share of the profits. She had access to the books at all times, and received much of the cash that was taken in, as she acted as cashier, during the greater part of the time. The partners held a consultation every evening, when the expenditures and receipts for the day were ascertained, and all the affairs of the partnership were perfectly free and open.

The young men admit the assignment

The young men admit the assignment of their father's interest in the lease, but assert that the interest was in the proportion of one-third to each of the three partners, and not one-sixth, as alleged by Mrs. Seighold.

Fair notice was given of the proposed dissolution of partnership which was brought about by Mrs. Hart's marriage to Mr. Seighold after an acquaintance of only six weeks. The young men allege that Seighold came to the hotel and assumed an exceedingly dictatorial manner, stating that he was about to

buy his wife's interest and enter the partnership.

At this, the Hart boys gave notice of their wish to dissolve the partnership, and began negotiating with Mrs. Bernard for another lease of the Natick House. Mrs. Seighold was aware of this fact, and went to Mrs. Bernard, offering her an increased rent in order to obtain the lease, but was refused. The Hart boys are as anxious as Mrs. Seighold for an adjustment of affairs, having repeatedly offered to affairs, having repeatedly offered to buy out her interest, but without being able to come to an agreement on the

Judge Smith took the sad circumstances of the case into consideration, and the deep contrition of the weak and broken man before him, and gave him the comparatively light sentence of two years in San Quentin.

New Trial Denied.

Judge Van Dyke yesterday denied the motion for a new trial in the case of G. L. Schmidt et al. vs. Louis Mesmer, involving the lease of the United States Hotel, in which judgment was ordered for the defendant. The plaintiff moved for a nev trial, principally on the ground that one of the instructions given at the request of the defendant was erroneous. Judge Van Dyke decided that this instruction, when taken in connection with the others, was not susceptible of the interpretation put upon it by the plaintiffs, and that the jury could not have been misled by it. All the instructions asked on the part of the plaintiffs, bearing upon the merits of the case, were given, the only ones refused relating to the measure of damages in case a verdict should have been given for the plaintiffs. The verdict in the Willard case, which has for the past several days been on trial in the United States District Court, was rendered at noon yesterday.

The jury, which had been locked up over night, appeared in court yesterday and the structions on certain technical questions. The desired instructions were given by the court, and, after retirings for a short time, the jury signified its readiness to render a verdict, and presently the statement affecting the fates of the four defendants was read. It was that C. D. Willard had been found not guilty.

For a few seconds the defendants remained silent as if not comprehending the purport of the verdict. A little later C. D. Willard was seen to shed tears, and not long afterward. The court ordered that F. A. Willard bed ischarged and that the three others be remanded to the custody of the United States Marshal. The jury recommended mercy to A. P. Willard at the father of C. LONG BEACH'S RIVAL.

Deean Park May Get the Next Chan-

According to the statement of one of the persons most interested. Long Beach stands a good chance of losing the Chautauqua Assembly and Summer School next year, as the members of those institutions do not all feel satisfied with the treatment they received at Long Beach this season. Said one high in authority in the Chautauqua Association yesterday:

"Although the Chautauqua brings hundreds, yes, thousands, to Long Beach, yet the town does nothing at all in return. Even the auditorium has to be paid for at a high figure. The summer school was a grand success, even in its very inauguration, yet it, too, was greatly handleapped. The rooms were scattered, often nearly half a mile from the tabernacle, and some of them, though paid for at a high rate, were granted with only half-heartedness, and some were occupied under conditions that were very inconvenient.

"Many who are interested feel that there must be a change; that the permanent location of this assembly, with all that it will bring, will be a great appreciated. It is further felt that a just appreciation will secure free of rent an auditorium, suitable class-rooms near

preciated. It is further felt that a just appreciation will secure free of rent an auditorium, suitable class-rooms near at hand, for the summer school, and such a warmth of support that the officers of the assembly and visitors shall feel that they are warmly welcomed, not simply tolerated.

"They also feel that, while Long Beach has much to recommend it, and with a reasonable show of appreciation on the part of its people could and would secure the assembly as a permanent institution, yet there are other places where it might do as well, and in some respects better, and that the assembly is in no sense bound to remain at that place."

Prof. O. P. Phillips of the board of directors and Prof. A. J. Cook of the summer school visited on Monday of Coean Grove, to look into its suitability as a place for the permanent location of the Southern California Chautauquata Assembly. They report that they found a fine beach, good bathing privileges, a fine outlook, an auditorium that will accommodate \$90, and which will be enlarged—doubled if required—and were given assurances that classrooms will be constructed close by to meet all demands, and that all needed cottages will be in readiness for the season.

Ocean Grove is only a short walk from Santa Monica, with which it is connected by street cars, so that the best of accommodations are near at hand. They were also assured that hotels and restaurants would be at command close at the grove, and the rates not in advance of those at Long Beach. While, neither gentlemen committed himself as to his purpose or feelings, it was very evident that both were much pleased with this location. The Santa Fe Raliroad also stands ready to gooperate heartily in securing the assembly at Ocean Park. we can from the Southern Pacific, and it amounts to considerable. The Southern Pacific's average profit on a through ticket is \$17. Now, we four ticket-brokers of Los Angeles sell twenty tickets, on an average, every day. Therefore, when we divert all our business to the Santa Fe we take \$340 a day from the Southern Pacific. This amounts to over \$100,000 in a year. Everyone can see why the Southern Pacific is making elbow-tickets. They are doing it to take business from the Central Pacific and Union Pacific lines and render them almost valueless. They hope, by this action, to discourage the foreclosure of the government's liens on those two lines. The more the railroads fight among themselves the better for us! We're right in our element."

This was agreed upon because of the determination of the Northwestern and Union Pacific combination to cut the time between Chicago and San Francisco. The two roads have determined to run through sleeping-cars from Chicago to San Francisco and Los Angeles in such a manner that the present running time between Chicago and San Francisco will be shortened by one night on the road. It is expected that twenty-four hours will be saved on the time to Los Angeles.

EIGHTY FRUITFUL YEARS.

MRS. STANTON'S BIRTHDAY.

A Talk with the Ploneer of Woman' Progress-Mrs. Stanton Tells How and Why She Became the Cham Her' Sex-A Beautiful Old Age.

(CORRESPONDENCE OF THE TIMES.) NEW YORK, Oct. 28.-In Mrs. Stan ton's case the almond bloom of age is as beautiful as the apple-blossom of life's spring. With every faculty in control, a brilliant mind enriched with memories of half a century and a magnetic personality, Mrs. Stan-ton has retained beauty and power. Those who do not sympathize with all of her theories and endeavors cannot fail to appreciate her courage and her mental endowments.

IN HER HONOR On November 12, her eightieth birthday, the National Council of Womer of the United States, numbering twenty organizations with a membership of 700,000 women, propose to hold a celebration at the Metropolitan Operahouse

With her work today every one is familiar; but comparatively few per-

MRS. STANTON'S STORY. MRS. STANTON'S STORY.

The death of her only brother gave her the first suggestion of the superiority of a boy to a girl. "I well remember," says Mrs. Stanton, "going into the large dark parlet to look at my brother, and finding my father there pale and immovable by his side. I slowly approached him and climbed upon his knee. He put his arm around me, and I lay there with my head on his breast for a long time. Then he heaved a deep sigh and said: 'How I wish you were a boy!' 'Well,' I said, 'I will try and do all that a boy does!'

heaved a deep sigh and said: 'How I wish you were a boy!' 'Well,' I said, 'I will try and do all that a boy does!' "I went to bed that night thinking what I could do. I decided that I would learn to ride my pony. Up to that time I never would go out without the coachman having the bridle, but I decided that I would be courageous and brave and learn to ride alone And and brave and learn to ride alone. And

then I would study Greek.

"So the next morning, as soon as I was dressed, I hastened down to meet our good pastor in his garden, which joined our own. Finding him there at work as usual, I said: 'Doctor, which do you love the better, boys or girls?'
"'Why, girls,' said he, 'I would not give you for all the boys in the uni-

"Yes, my child,' said he, throwing down his hoe, 'come into my study and we will begin at once.' There he taught me the Greek ar-

ticle before breakfast, and I can hear his old broad Scotch accents as clearly as I did sixty-nine years ago." IMPORTANT INFLUENCE

Soon afterward she entered the academy of her native town, studying with the boys Latin, Greek and mathemat-ics, but from the old Scottish clergyman she received many influences dur-ing the formative period of her char-

old common law of England. A married woman could not inherit any property; whatever was left her went to her husband. She could not have her own wages; if a woman worked all day long, what she earned belonged to her husband at night; and, if you paid her, the law could compel you to pay him over again. A woman could not do business in her own name; she could not make a contract; she could not sue or be sued; she name; she could not make a contract; she could not sue or be sued; she could not own her own children. Sitting in my father's office I listened to all these complaints of the women and got my first idea of the cruelty of the laws. The women used to weep and talk, and my father seemed so helpless to do anything for them!

"When I asked him why he did nothing for these women he said: Well, the trouble is the law is in the way.' When I would say 'Let me see wor!

the law.' I could not believe that any-thing could stand in the way of reme-dying such trouble.

thing could stand in the way of reme-dying such trouble.
"Seeing my indignation, the students used to amuse themselves looking up the very worst laws relating to women the very worst laws relating to women and reading them, to me, so that they kept me in a constant state of wrath. After a while I got them all marked, and I used to go into the office and read them over and over again. At last I said: 'If these laws are the things that make all women so miserable, I will just get a pair of scissors and cut them out, and that will end their suffering.'

ind cut them out, and that will end their suffering.

A CASE IN POINT.

"Now, Flora Campbell, who used to wear a big red cloak with a hood, came every Saturday and brought us chickens, eggs, maple sugar, and sweet flag, and I had a very tender feeling for Flora Campbell. One day when she had been 'alling my father what she suffered at the hands of her son and his wife (for her husband had left the farm to the son, although Flora's money had bought the land) who did not take good care of her, I said: Now, Flora, dry your tears, I am going into the office to cut every one of those laws out of the books, and you will have no more trouble."

"Flora told my father, and he took me into his office. 'If my office should burn tonight,' he said, 'It would make no difference, as there are a hundred lawyers in the State and all have these

no difference, as there are a hundred lawyers in the State, and all have these lawyers in the State, and all have these same books. When you are older, you can go down to Albany and tell the Legislature what you have witnessed here, how badly these laws work, and then they will pass new ones. My thought then turned to the time when I would be big enough to go down to the Legislature.

A KEEN DISAPPOINTMENT.

"At the Johnstown Academy I studied everything that the boys did, and my one ambition was to outstrip a boy in everything so as to make my father say: "Well, after all a girl is as good as a boy." I was riding splendidly on my pony, and kept at the head of the class in Greek, Latin and mathematics, until, when the class was graduated at the end of five years, I took the second prize—a Greek Testament. "I hastened home, rushed to my father, but when I was aching to hear him say something to show he recognized the equality of the daughter with the son, he kissed me on the forehead and exclaimed with a sigh: "Ah, you should have been a boy!" That ended my pleasure. I fied to my room, flung the book on the floor, and wept tears of bitterness. A KEEN DISAPPOINTMENT.

GOING TO THE LEGISLATURE. "In due time I was married, and two
of the young men who had studied
with me at the academy were elected
to the Legislature.
"Another influence upon my devel-

opment was my cousin, Gerrit Smith, a great Abolitionist; and visiting in his house I met many Abolitionists, and heard discussed the question of human rights. I used to go with him to conventions, and all the pleas that I heard for negroes' freedom, I applied to women. It was at his house that I to women. It was at his house that I met my husband. Our wedding-trip was to England, where there was a call for the World's Anti-Slavery Convention. This was in 1840. The women had taken a very active part in the anti-slavery agitation, and women delegates were sent; but when they reached their destination they were not allowed to take their seats.

"When I returned home I decided to hold a convention and discuss women's rights, for I considered the condition of woman about as degraded as that

of woman about as degraded as that of the slave on the Southern plantation. I wrote to my two friends in the Legislature to know if I could have a hearing on the Married Woman's Property Bill, and they replied 'Yes.' From 1840 to 1848 Ernestine L. Rose, Pauling Wright and myself had est. Paulina Wright and myself had cir-culated petitions in the State of New

York.
"I used to go up in the garret every day and read over my speech, thinking I could slip to Albany and back without the knowledge of anybody but the Legislature; and, one day when I without the knowledge of anybody but the Legislature; and, one day when I was thinking of all this, my father entered with the old Albany Evening Journal, edited by Thurlow Weed. He laid the paper down in front of me, and said: 'What does this mean?' And and said: What does this mean? And there I read: 'Elizabeth Cady Stanton is to address the Legislature Monday afternoon at 2 o'clock on the 'Married Woman's Property Bill.'
"I answered: "I suppose it means what it says.' He was perfectly con-

what it says. He was perfectly confounded, and so was I.

"Then he said: 'When my clients have gone, I wish you would read it to me.' I was in the depths of despair; I had never seen my name in print before, and thought it was the most awful disgrace that could befall a women.

HER FATHER'S HELP.

HER FATHER'S HELP.

"When I read my speech to my father, he suggested several improvements, and found worse laws for illustration than I had, working with me until 1 o'clock in the morning; yet for a conservative old Judge to have his daughter the subject of ridicule was a a conservative old Judge to have his daughter the subject of ridicule was a deep blow. I spoke two hours, and this, my first speech, was published in the Evening Journal. That same year, 1848, the married woman's property law passed, and gave married women their rights to their property. That same year there was a constitutional convention, and we moved to Seneca Falls, where I called the first woman's suffrage convention ever held in the world. This was organized in the Methodist Church and lasted two days, during which we issued a declaration Methodist Church and lasted two days, during which we issued a declaration and a series of resolutions. We had not the slightest idea that anybody would make fun of it, but it was laughed at and ridiculed from one end of the country to the other. I, have lived to see an entire revolution in woman's field of energy.

"I am busy now upon the Woman's Bible, a new translation of the important texts and chapters relating to the position of women. I myself have had charge of the Pentateuch, which I expect to publish within the month, with comments relating to the position of woman in antiquity."

The two pictures of Mrs. Stanton shown here are illustrative of life. The first shows her at the beginning of her pioneer career. It is suggestive of the pictures of Sonya Kovalivsky, the famous Russian mathematician.

Nomination of Blaine.
(November Scribner's:) The announcement of Blaine's nomination unleashed the latent insanity of ten thousand people within the hall. Hats were thrown high in air, umbrellas whirled around, the State shields torn down and borne proudly upon filial breasts. The crowd outside caught the contagion, and soon a shrill chorus of tug whistles could be heard from the Chicago River. The climax was reached when some one brought and laid upon the chairman's desk a floral helmet, with snowy plum of finest imported horsehair. The noise redoubled, men took off their coats and waved them; women laughed, or cried or fainted, impartially.

A COSMOPOLITE LEAGUE.

(CONTRIBUTED TO THE TIMES.) Perhaps for the majority of tourists, travelers and home-seekers alike, the most abiding charm that a city can cultivate is cosmopolitanism. There are numberless cities in the Old World, and not a few in the new, where the artist, antiquarian and ecclesiastic may satisfy their souls to the full, but only population. It is not absolutely neces

population. It is not absolutely necessary that the cosmopolitan town should be a capital, should have "the best climate in the world," the finest theaters, or any other superiative attraction. The cosmopolitan characteristic attaches to persons in the first instance, and only sequentially to their institutions and clites. It may be found in a club, a, church, or a cafe but is best seen in a community which insists on its affairs being conducted on a broad, effightened and repeated on a broad, efficiency in the control of the con

as is now done in London after costly experiments above ground.

THE JEWS AND THE BIBLE.

BY DR. G. A. DANZIGER.

(CONTRIBUTED TO THE TIMES.) There are a few mistaken ideas about the Jews, running wild in this world of ours, which to set aright is a duty. The the Jews, running wild in this world of ours, which to set aright is a duty. The Jews have had a sufficiency of laudation and damnation, neither of which was really deserved. The fact that they are liberal patrons of Col. Ingersoll's trite lectures gave rise to the idea that all Jews are infidels. It was reasoned thus: Disinclined to believe in the myths of the Old Testament, and unwilling to accept the New, they hall infidelity with delight. While the cogency is adequate, the reason lacks the elements of perfect truth. The Jews are not infidels.

Another class of people again reason differently. The Jews are bound to believe every statement of the Old Testament; for, are not they Jews? Jews, who even now persistently reject Christ? If they do not believe in the old dispensation, why not accept the new? If they do not care for the angry Jehovah, why not embrace Christ's love? No, no; the Jews are Jews still, believing as their fathers believed, hoping for the fulfillment of the prophecies as their fathers believed, hoping for the fulfillment of the prophecies as their fathers believed, hoping for the fulfillment of the prophecies as their fathers hoped and praying, as they did of old, for a Redeemer to lead them to the "Land that floweth milk and honey."

Wrong again, my friends. The modern Jews believe nothing of the kind.

milk and honey."

Wrong again, my friends. The modern Jews believe nothing of the kind.

And yet, were you to ask any ordinary Jew what he believes, I doubt if the answer would come forth as glibly and trippingly as you would expect. He might tell you he believes in Judator, but if you inquire: "What is Judator," the answer will not come at all.

Why? Because there are not a half-dozen Jews, rabbis included, on the Pacific Coast, who could answer the quescific Coast. cific Coast, who could answer the ques-

and Yeheveh, by grammatical adjustment, means God will be! Thus he goes through the uses of this cosmic volume and luxuriates in a garden to which the uninitiated have no admittance.

To appreciate the Bible, one must read it in the Hebrew language. To grow conscious of its beauties, grasp the great truth it contains, you must be a Jew, a learned Jew, or know the yeue in which David sang. The Jew reads the Bible in Hebrew; he feels the weight and value of every line and measure; he becomes an actor in the dramas written and acted by his poets and seers. This is as it should be. One who could read French would not think of reading Dumas or Hugo in translation; the same is true of every form of literature. The best translation of Homer's works does not interest the man who can read the resonant and swinging lines of Hellas's immortal bard.

This much for literary preference.

Y

est the man who can read the resonant and swinging lines of Hellas's immortal bard.

This much for literary preference; viewing the Bible from a religious point, they differ vastly from the Christians. They look at it as a book of nature, subtle in expression, like the tints of a rose; rariformed like the fora of a garden; heterogeneous elements made homogeneous by the love of a people for the country and the expression of thought in produces. The most remarkable book that has ever been or ever will be written; not inspired, but inspiring; not the truth, but the repository of great truths; a casket of the most exquisite workmanship, containing jewels of priceless value, and also some dull lackluster baubles, it is the basis of literary conception and artistic expression, and because of its various and interesting pictures, scenes, dramas, narratives and proverbs, constitutes the guide of literary taste. Some of its fictions are lovable because of the rhythm and resonance, beauty and fire of its expressions. No one thinks of taking them as facts, no more than any student of mythology would think of taking them as facts, no more than any student of mythology would think of taking them as facts, no more than any student of mythology would think of taking them as facts, no more than any student of mythology would think of taking them as facts, no more than any student of mythology would think of taking them as facts, no more than any student of mythology would think of taking them as facts, no more than any student of mythology would think of taking them as facts, no more than any student of mythology would think of taking the because of the Bible. What is human happiness made of but of a few truths and many fictions? For the matter of at, no literature can show anything at adequately might fank with the Bible. Shakespeare's most in "Paradise Lost" are far behind some poalms or some chapters of the

great unknown—isalah. The simple narrative form of Joshua, Judges, Samuel, Kings and Nehemiah surpasses by far either Herodotus or Macaulay. The "Songs of Songs" is a poetical work of transcendent perfection: "Ecclesiastes" breathes the philosophy of every age and all time, and "Ruth" surpasses all poems, in prose or verse, ancient or modern. Take, for instance, Homer, Virgil, Livy, Tasso, Ariosto, Walter Scott, Tennyson and our own Lew Wallace, all these reach the zenith of art in their description of battles, duels and races; but their art does not surpass the simple story of the duel of David and Goliath. Dramatic force is exhausted in the life and adventures of Joseph, the exodus of the Hebrews from Egypt, the fall of Jericho, the death seene of Elijah, the song of Deborah, Dāvid's lamentations about Saul, the lives and adventures of Jonathan and Absalom, and last, but not least, those grand, wonderous strains, those sobs and heartending speeches of Jeremiah as he sat upon the ruins of Jerusalem.

Taking the Bible, therefore, as the work of man, without rejecting the possibility of inspiration, though with the certainty of its inspiring force, it is the highest specimen of literary art, a quodlibet of all forms of literary expression. If illerature be conductive to the greatest happlacess of mankhid, then the Bible has contributed the greatest share.

There is another, grander, idea in the Lew's love for the Fiblic (and he

pression. If literature be conducive to the greatest appliess of :nankhid, then the Bible has contributed the greatest share.

There is another, grander, idea in the Jew's love for the Bible (and by Jew I mean the learned Jew, for it is he, and he alone of all his people, who thinks and reasons intelligently about these subjects) and that is the monothelstic doctrine, which runs through the books like a red thread in a blue web. However diversified the subjects, however different the form and style of each book, however distant the time between the composition of the works, one thought permeates the whole—the belief in one ever-living, ever-present, omnipotent Creator and Ruler of the Universe. It is as if some malevolent spirit and not the awakened consciousness of the oneness and harmony, the homogeneity of the universe, had inspired and burdened a people with this doctrine. Begotten in an age of idolatry, this one idea withstood the onslaughts of every-form of human antagonism, has caused its adherents untold agony, and seems to be destined to unite all mankind under the benign influence of its wisdom and rationality. The speeches delivered by the prophets against the oft-occurring weakness of the Jews to worship the idols of their neighbors—by the way, a species of national suicide—constitute the chief beauty of the Bible.

The Jews, it is well known, are optimists; they are not as rash nor as

ity and Mohammedanism—came into existence. As it is, who can tell how much has been lost; how much poorer we are today in humanity, brotherly love and general mental enjoyment. According to the book of Kings, Solomon must be credited with having uttered 3000 proverbs, and the composition of 1005 songs. Of the former but few are extant, and of the latter we have the "Song of Songs," the idealic charm of which magnifies our regret for the loss of the others.

The Bible is the Jews patent of cos-

charm of which magnifies our regret for the loss of the others.

The Bible is the Jews' patent of cosmic citizenship. By means of this he preached to the world the doctrine of liberty, equality and fraternity. What the world gained in art, philosophy, eye; even science, is largely due to the Bible. God-graced poets transplanted Sharon's lilies and Jericho's roses into the gardens of the Occident. Racine, Shakespeare. Byron, Lessing, Milton, Kloppstock, Herder, Goethe and Schiller all drank at the biblical fountain: from its pages they gleaned the simplicity of their literary art; but greater than they and their art was the Jew, who, amidst joy or sorrow, opulence or ceaseless, homeless wanderings, treasured this book as the most precious heirloom of a time, when patriotism meant to him devotion to his God and his own country. He never failed to read, it was read to him thrice weekly in the synagogue.

LOS ANGELES COLTS LEADING FOR THE CHAMPIONSHIP.

Almost Errorless Game Was Played Yesterday - Johnson's Curves Were Batted for Eight Runs-Irwin's Good Catch.

The Los Angeles and the Oakland The Los Angeles and the Oakland baseball teams played an almost perfect game yesterday. Neither pitcher allowed a man to reach first on balls. The error charged to Decker should be scored against Umpire Stockwell, his decision being very rank.
McQuaid opened the first inning with a pretty line hit to right field for three bases, and scored on Mertes's single. No other run was made until the first

over the leftfield fence, both men scoring.

In the eighth, McQuaid singled, stole second, reached third on Wilson's wild throw, and scored on Mertes's ringle.

In the last part of the eighth, O'Rourke singled and reached third bag on Irwin's double. O'Rourke scored on Van Haltren's sacrifice hit. Irwin also scored on Burns's single to short.

In the ninth the locals landed on Mr. Johnston's curves. Cantillion singled, but was forced out at second on Spear's hit to Irwin. Hickey hit for' a double. McKibben followed with another double. Spear and Hickey scoring. Barnes singled to right, and McKibben scored. Mertes singled, Barnes reaching third on the hit, and scored on Decker's single, Mertes being put out at third bag.

In the last half of the ninth inning, the Oaklands scored two runs; Treadway singled and reached third. Wilson hit McHale, who threw to Spear at the home plate, to catch Treadway; the ball went ten feet over the 'Kid's' head, and both Treadway and Wilson scored; this was really the only bad error in the game.

Irwin's catch of Spear's hit, in the seventh inning, was the feature of the SMcQuaid, if. & R B BH PO A E

Today is the last appearance of the Oaklands for the present series. The management, appreciating the hard times, have reduced the price of admission to 25 cents.
Tomorrow the Trilbys will play the Los Angeles team and it will be worth the price of admission to see Svengall Griffen, the six-foot 8-inch thirdbaseman, and Trilby Shaw, on the coaching lines. This team is the best colored team on the Pacific Coast and will make Manager Flynn's Colts play hard ball to beat them.

young Englishman must pay duty. The whole case hinges on the fact that he sent for the things instead of bringing them as personal baggage across the line.

According to a regulation of the Treasury Department all baggage has either to accompany the owner into the country, or else be temporarily out of his control, as in the case of delays for which he is not responsible.

If voluntarily left across the line, and sent for after a residence of more than three months in this country, even wearing apparel is reckoned as imported goods, and assessed accordingly, whether new or old.

In this case the young man made a signed declaration, fixing the value of his goods at \$50, and by that valuation, which must go to Washington, the collector is obliged to abide.

Mr. Gaffey expresses much sympathy for the boy, but cannot see his way clear to evading the law in the case.

T. FOO YUEN, M. D.,

Imperial Chinese Physician,

Dr. T. Foo Yuen, who is the only graduate of the Imperial College of Medicine at Pekin, China, at present residing in America, has an office at No. 17 Barnard Park. Los Angeles, where he is constantly being consulted by patients who have been abandoned as hopeless by American physicians. He has successfully treated a great many of these cases by his novel, scientific and harmless yet efficacious methods. These methods are based upon a consistent and complete philosophy of medicine, the acquisition of which occupied Dr. Foo for nearly a quarter of a century of constant study and practice.

The fundamental principles of the Chinese system of medicine is to prevent the encroachments of disease whenever possible. If you are beginning to be ill do not delay until your health, and perhaps your life, is endangered, but take at once a preventive course of medicine under Dr. Foo's advice. This may prevent a long and serious illness. If, however; you have been ill for years and have been treated unsuccessfully by your family doctor, there is all the greater reason for your consulting a physician whose simple yet potent remedies have been found of wonderful value in the cure of chronic ailments.

Dr. Foo's diagnosis is entirely by the pulse. His remedies are purely herbal. There is no charge for consultation and opinion. Incurable cases will not be treated. Dr. Foo may be consulted any day between 9 a.m. and 5 p.m. Valuable printed matter explaining the Chinese system of medicine will be sent free to any address upon application.

Colorado street from Marengo to Little avenue was plowed up to day preparatory to grading for the asphaltum pavement. Col. Fulton was superintending the job with a large force of men and a huge tree-plow. At one point in the work a large beam, below the surface of the ground, was struck, and every bolt loosened in the plow. That portion of the street will be impassable for some time to come, but the work will be pushed as rapidly as possible in order that R may be completed before the wet season begins in earnest. The grading of Broadway to Green street will follow the work on Colorado, and asphaltum will be placed there also, and asphaltum will be placed there also. Colorado street from Marengo to Lit-

The grading of Broadway to Green street will follow the work on Colorado, and asphaltum will be placed there also. The Southern Pacific will bear the expense of the work, that being a concession made to the property-owners by the road on account of the waiving of a protest against their fence on Broadway. The grade on Colorado street is not exactly true in one place, and some of the curbing will be removed in order to rectify the error.

There was a meeting of property-owners on East Colorado street Monday night in the office of the Lake Vineyard Land and Water Company, the subject of street-paving being the matter under discussion. Thursday night another meeting will be held. It is the opinion of those who travel on that thoroughfare that talking has gone about far enough, and that it is time that some more substantial action should be taken. While the well-crowned and

be taken. While the well-crowned and graded streets are hard and smooth mow, after the recent rain, Colorado street is muddy and disagreeable to travel over. A heavy rain will convert the thoroughfare into a sea of slush. Talking could continue all winter, and probably will, unless some of the citizens up that way "get a move" on them and declare that the time for action has come.

PROPOSED NEW CLUB.

To be Patterned After a Los Angeles

Several well-known gentlemen of Pasadena have had under discussion for some time the project of forming a club on the lines of the Sunset Club of Chicago and Los Angeles. Subjects of general civic and social interest are to be presented before the club by local of general civic and social interest are to be presented before the club by local speakers, or those who come here from other cities, and once each month a banquet is to be held at some prominent hotel. A preliminary meeting for the purpose of canvassing the subject was held Monday evening in the office of James H. Adams on Colorado street, and, after talking over the plan, to which a hearty assent was given by those present, it was decided to hold a meeting in the office of A. R. Metcalfe Tuesday evening, to consider organization. Each gentleman was invited to present the name of a friend at that meeting, and the ten gentlemen who were present, with such others as they may select, will form the charter membership. Those who are active in the movement for the organization of the new club are: Messrs. James H. Adams, A. R. Metcalfe, A. C. Merwin, F. R. Harris, H. H. Klamroth, M. E. Wood, Prof. McClatchle, Dr. Abbott, F. E. Wood.

An Antique Curiosity.

An Antique Curlosity.

A suit of Japanese armor, 400 years old, composed entirely of laquered steel plate and chain-linking, was one of the curiosities which attracted much attention in the window of a Japanese store on Colorado street today. The gorget and shoulder-pieces are ornamented with steel buttons, wound with bright colored silken tape, and the overlapping pleces of metal were bound together with tapes and linked chains. The armor is such as was anciently worn by the warriors of the Mikado.

PASADENA POSTOFFICE.

LARGER APPROPRIATION NEEDED FOR ITS MAINTENANCE.

Remarkable Growth of the City Shown by Reports Made by Let-ter-carriers—The Postoffice Safe Shut Tight as a Clam.

PASADENA, November 5.—(Regular Correspondence.) The committee appointed at a recent meeting of the Board of Trade to confer with Postmaster Kernaghan, and Postmaster-lect Wotkyns in regard to the amount of the appropriation needed for the purpose of conducting the Pasadena postoffice in good style, requested Mr. Kernaghan to furnish them with some data as a basis for action. With a view to doing this satisfactorily, and also with a view to securing additional carrier service for Pasadena, the carriers were asked to report the new houses which have been built on their respective routes since the first of the year. The result shows the astonishing increase of population in Pasadena in that time.

Carrier No. 1, who distributes in the

houses which have been built on their respective routes since the first of the year. The result shows the astonishing increase of population in Pasadena in that time.

Carrier No. 1, who distributes in the business district did not hand in a report, but the increase in new offices and stores has been proportionate to the residence increase. Carrier No. 2 reported forty-two new houses on his route. No. 3 reported forty. No. 4 brought his record in containing seventy-three new houses, and No. 5 capped the climax with seventy-eight new houses in his district. This makes the number of new residences erected in Pasadena since January 1, 1896, exclusive of those in the business district, 233. Every one of these houses is occupied, the residents being mostly newcomers, or the houses which they vacated to move into the new ones were taken by newcomers.

Besides the new houses already occupied there is a large number of residences in process of construction. The carrier district does not include all of what may legitimately be called Pasadena, as it includes the territory north to the city line on certain streets, south to the city line on certain streets, south to the city line on certain streets, south to the city line, west to Grand avenue, and east to the line. The city's claim to 10,000 inhabitants, based on the new directory, is, under these circumstances, very moderate, and when North Pasadena comes in, as she probably will in the spring, the greater Pasadena will be an accomplished fact. Pasadena is Los Angeles's big sister, and is growing in stature and beauty every day.

The postoffice safe is still tightly shut, defying all efforts to open it. The department has been consulted, and in the mean time Postmaster Kernaghan is running the office with his own private funds. He declares that if the department does not cause the safe to be opened soon, Pasadena people will be obliged to purchase their stamps in Los Angeles.

Congressman Melachlan's Plans.

Congressman McLachlan's Plans. Congressman James McLachlan contemplates departing for Washington some time this month, probably about the 15th. He expects to make a visit to his old home in New York and eat his Thanksgiving dinner there with his family friends. Pasadena people expect something in the way of benefits from the fact that the Congressman from this district is from this city. Local interests have been somewhat neglected in the past. Pasadena has never asked for much, and never got much of what it did ask for. Now it is expected that local postoffice matters will receive some attention from the department through Mr. McLachlan's efforts, and that we will be able to receive a sufficient appropriation to keep the postoffice in creditable shape, and give carrier and clerk service sufficient for the needs of the town. Congressman James McLachlan con-

Election of Officers.

The members of the Juvenile Temple, I.O.G.T., elected officers recently as follows: Superintendent, Gertrude, Ralston: C.T., Harold Keyes; V.T., Lecta Larkin: P.C.T., Bessie Richards; chaplain, Maud Murphy; treasurer, Floyd Lathrop; financial secretary, Tom Mather; recording secretary, Nora Card; assistant secretary, Lloyd Massey; marshal, Eliot Howe; guard, Fanny Furman; sentinel, Charlie Card.

Mr. Clem, his wife and a friend had an unpleasant experience recently, which might have resulted fatally, and which might have resulted fatally, and they are congratulating themselves on their lucky escape. Sunday the persons referred to partook of some meat which had been cooked in a metal vessel, and soon after dinner all were seized with a violent illness, which necessitated the services of a physician. The doctor found symptoms of poisoning, and Mr. Clem was so seriously ill that his life was in danger. All of the patients were ill for several hours, but have recovered their usual health.

Law Students' Banquet.

The Pasadena Law Students this vening enjoyed an appetizing banquet at Hotel Painter, the occasion being their semi-annual social meeting, at which times good speaking, good eating and hilarity are the main features in the programme. The jolly young stuthe programme. The folly young stu-dents are preparing themselves for one of the essential features of the career of a successful lawyer, that of making-clever after-dinner speeches, and some of the members of the club come out strong on such occasions. T. W. Rob-inson presided as toastmaster this evening, but only members of the club were admitted to the festivities.

TOWN TRUSTEES DEFAULTING

Grand Jury Gets Down to Business.
A Few Sensations Expected.
Absconded Bean-threshers—New Threshing Record Established,

VENTURA, Nov. 5-(Regular Correspondence.) The regular weekly meeting of the Town Trustees was held last night in the City Hall. The regular city election, which this yea. falls on Monday, December 2, was called. The usual tilt of words between the Trustees and the City Attorney was indulged in, during which Attorney Shepherd read a mild riot act to the board for what he termed an unbusiness-like method of transacting the city's affairs. During the war of words it transpired that the transacting the city's affairs. During the war of words it transpired that the City Attorney has not been paid his fee for conducting the trial of the water cases before Judge Ross in the United States District Court. In this connection it was ctated that Special Attorney George J. Denis of Los Angeles, who was paid a fat fee for aid rendered the City Attorney, has been drawing down 10 per cent. a year interest on his fee, which has not yet been paid, though the services were rendered over two years ago. In calling the city election the Trustees inaugurated a new system of economy in ordering the notice of election printed in but one paper in this city. This recalls the fact that, in calling the special election for the water bonds, they printed the notice in all five of the papers, which footed up a tidy sum, all of which proved to be a dead loss to the taxpayers through the subsequent action of the Trustees in setting aside the verdict rendered at the polls. City Marshal Cook was allowed \$150 for collecting city taxes in addition to his regular salary as marshal.

Four of the men went hungry from Friday until Sunday morning, when some of their friends furnished them with money to buy food. When the last run of beans was finished the camp broke up and the cook-wagon closed down, which left the men stranded. It transpired yesterday that Saturday afternoon one farmer paid something over \$300 for work done, which money the Crothers' put in their pockets and took with them into retirement. The men are sincerely pitied, but nothing can be done until the defaulters are located.

A NEW THRESHING RECORD.

A new bean-threshing record was made on the Dixie Thompson ranch last Friday. The run lasted eleven hours, including a half hour for dinner. During this time 2760 sacks of limas were threshed and sacked for market, which beats all previous records by nearly 100 sacks. The run was made under the personal supervision of Jim Kelley, who has held the record for several years, but wife, on this occasion, beat all previous records in this county or State. He had two sack-sewers, and one buck, and the usual complement of general hands. Another feature of this phenomenal run was the fact that the separator was of home manufacture, and was built of Ventura county material by two Venturians, Johnson & Hund. Mr. Kelly is the highest-salarled beanthresher in the State. The rivalry between the large ranches for the threshing record is one of the pleasant features of the haveest season, and for A NEW THRESHING RECORD. ing record is one of the pleasant fea ing record is one of the pleasant lea-tures of the harvest season, and for once no one disputes the record of the year, but all join in congratulating Mr. Kelly and his crew on establishing a threshing record which will be hard to duplicate.

BUSINESS.

FINANCIAL AND COMMERCIAL

OFFICE OF THE TIMES, Los Angeles, Nov. 5, 1895. LOS ANGELES CLEARING-HOUSE. The system of bank clearings in use at the Los Angeles clearing-house is the same as that of many other cities in the United States, but a uniform sys-tem throughout all of them does not prevail. The one in use here is what may be called the "truthful" one, in asmuch as the checks to be "cleared" are not counted twice. Some clearing-houses do this. They count the checks when brought in by the clerks of the banks holding them, and they count them again when they are handed over them again when they are handed over to the clerks of the banks who are to pay them. This is altogether wrong and is done for the purpose of making a large showing. It does not, of course, affect the percentage of increase or decrease in the clearings, but it makes the transactions of the clearing-houses which employ this false system appear larger than those of clearing-houses which count checks only once. In the Los Angeles clearing-houses the checks to be "cleared" are only counted once, and this is a fact that should be borne in mind by those who are fond of making comparisons between this city and others of the volume of bank business done.

ing comparisons between this city and others of the volume of bank business done.

On the invitation of J. F. Towell, manager of the Los Angeles clearinghouse, a Times reporter was present at yesterday's meeting at the offices of the clearing-house in the Bryson Block. The following banks are members of it: The Farmers and Merchants,' the First National Bank of Los Angeles, the Los Angeles National Bank, the California Bank, the State Loan and Trust Company, the Citizens' Bank and the National Bank of California: The representatives of these banks meet sharp at 1 o'clock each week day and bring with them the checks deposited in their respective banks drawn on the other banks, members of the clearing-house. Each one passes to the others a statement of the total amount of checks he holds against them, and the debit and credit balances due to or from are then figured out and entered by each on a printed slip. These slips are handed to the clearing-house clerk, who enters them on a tabulated statement. If the amounts have in all cases been figured out correctly the two columns showing the total amount of checks to be exchanged will agree. The two columns of debit and credit balances will also agree, but if any of them have made an error, the footings of the clearing-house elernined, the representatives return to their respective banks and report the amount due to and from have been determined, the representatives return to their respective banks and report the amount to be received or the amount to be paid. Under the rules the debtor banks have up to 1:30 p.m. to pay into the clearing-house the balances due to the creditor banks, and the latter are allowed up to 2 p.m. to call and receive their balances, all checks having, in the mean time, been handed in to the clearing-house clerk, who in turn hands them to the bank on which they were drawn,

and not in checks on their own bank, as is done in some clearing-houses. Provision is also made for the settlement of checks drawn on country banks. These latter usually keep deposits in some of the city banks, and they take up the checks of their country-bank customers just as they would a check drawn on their own bank. The beauty of the system is the rapidity and absolute correctness with which and absolute correctness with which and absolute correctness with which the business is dispatched.

COMMERCIAL,

VEGETABLE SHIPMENTS. NOW that fresh-fruit and grape shipments are over, the Eastern shippers are about to turn their attention to vegeta-bles. A member of the Earl Fruit Company stated today they would begin shipping celery to the markets in about two weeks. The celery grown on the peat lands in Orange county made a good name for itself county made a good name for itself last year in Chicago, and other Eastern cities, and the demand for it this year is expected to be very large. It has a finer appearance and better flavor than celery grown in ordinary soil. The first shipments will average about two carloads a week, but before the end of the present month they will not be less than four or five carloads a week of celery.

calery. Cabbage and cauliflower will be the other kinds of vegetables shipped, and if the weather continues favorable, it is expected that the shipments will be very heavy. Chicago, St. Louis and Kansas City will take the bulk.

Kansas City will take the bulk.

JAMAICA ORANGES. The American Groeer of New York publishes a letter from P. Ruhlman & Co., large fruit dealers in that city, in which another illustration is given of how frequently cupidity over-reaches itself, destroying that which it is in search of. The letter says:

"Jamaica oranges are arriving in large quantities, mostly half-grown, green and sour. Parties responsible for this deserve to make heavy losses, and no doubt will. Had this fruit been left on the trees for another month to get its full growth, and then shipped as required, everybody, including the general public, would have been benefited. As it is, nobody wants them. There never was such an opportunity to make money on them, but greed and judgment spoiled it all."

IMPORTS OF ORANGES AND LEMONS. From January 1 to September 1 of the present year, says the California Fruit Grower, the foreign oranges arriving at the port of New York are given by the Fruit Buyers' Union at 702,591 boxes; lemons, 1,235,458 boxes. All the lemons came from Italy except 3465 boxes which came from Melaga, Spain.

These figures show that, with the exception of the year 1887, the imports of oranges for the first eight months of this year were greater than during the corresponding period of any previous year since 1885. The importation of lemons has gone on steadily increasing year after year for the last twelve years.

No Courtship in Jerusalem.

No Courtship in Jerusalem.

Of courtship as it is known in America or England there is none whatever in Jerusalem, writes Edwin S. Wallace in November Ladies' Home Journal. A young Mohammedan never sees the face of the girl who is to become his wife until after marriage. His mother and sisters may see her and report their impressions, but if it is a case where the union is by them considered a desirable one they are likely to accredit her with charms she does not possess. Among Jews and Christians there is a greater latitude in this respect, though the young people are never permitted to see each other without the presence of a third party. In every case the services of an intermediary are necessary. Brides at 14 are not uncommon and at 12 occasion little remark. I have known of one bride 10 years of age. She was a Moslem.

SAN RERNARDING Nov. 5-Regular Correspondence.) Monday's correspondence detailed the arrest of E. M. Wormsley, or a man so styling himself, for drawing a check for \$10 on the San Bernardino National Bank, which George Hubbard of Colton cashed, Wormsley having no funds in

markable prisoner who has been entertained in the local bastile for many a day. He is high in Masonry, as members of the order in this city have had demonstrated to their satisfaction, and he claims to have been one of a committee of three which went to England some time are and admin-

tion, and he claims to have been one of a committee of three which went to England some time ago and administered the thirty-third degree to the Prince of Wales. Whether this is only a pretense or not, as one Knight Templar put it, "he is well up."

Wormsley appeared at the San Bernardino National Bank Saturday, introduced himself to Cashier Hooper and Vice-President Roberts, and finally, in keeping with his supposed rank and his prospective position in this city, he was shown the courtesy of being invited into the inner office. He informed the bank people that he had come to San Bernardino to succeed Foreman Williams of the Santa Fe shops. He said he had been brought out from the Wabash road by C. F. Lape, the new master mechanic of the Southern California, with whom he claimed an intimate acquaintance, but when, he was pointed out to Mr. Lape, that gentleman declared that he had never met Wormsley and knew nothing about him.

While at the bank, Wormsley deposited for collection his personal check for a large amount, drawn on a bank in an Eastern city. Subsequently he filled out a check for a small amount, and asked Mr. Hodber to accommodate him by advancing the money. But the banker enforced the iron-clad rule of demanding identification, and the check was uncashed. Wormsley then went to Colton and introduced himself to Masons there, finally succeeding in getting a 310 check cashed by George Hubbard. He presented some at other places, but none of them were cashed. He returned to this city yesterday, and the Colton man found that the paper he had negotiated was worthless, and followed him, the warrant being served by Constable M. A. Bagley.

The check which Wormsley deposited at the San Bernardino National Bank has been sent East, and no returns are expected for a week or ten days, and it will not be known until that time whether the check is genuine or not.

Wormsley was taken before Justice Bingham at Colton yesterday and sentenced in aever this.

all, is a very ordinary individual.

THE STRAIGHT STORY.

The Comptroller of the Treasury recently ordered the payment of another dividend of 10 per cent. to the depositors of the defunct First National Bank; and a local paper dashed the hopes of the depositors for immediate payment by publishing the statement that the checks were burned while en route. Such was not the case. Ten days ago the contents of a mail car on the Pennsylvania Rallroad were nearly entirely destroyed by fire. In that mail were seven checks for depositors of the First National Bank who had not received their first dividend. At the time it was paid a few depositors had not made the necessary affidavit, and were not entitled to receive their dividend at that time. The affidavits were made later; and the checks in payment of the 20 per cent. of their deposit were destroyed in the mail-car fire. It in no way af-THE STRAIGHT STORY.

It is of bluish granite and the point and edges are in perfect order. It is not believed to have been made for actual use as a missile, for even a Gollath could not have sped it. It could not have been the death of Prof. Wortman's Bitter Creek monkey, unless it was lifted and dropped on him. Whether it was used as a symbol or fetich by some ancient tribe can only be conjectured, and the present generation of local Indians is as ignorant as anyone "regarding its history. SAN BERNARDINO BREVITIES.

The Button case is now in the hands of the jury. Judge Otis concluded the reading of his instructions at 2:45 o'clock this afternoon, and the jurors at once retired, and as yet no word has come from the jury room. Attorney Byron Waters spoke all the forenoon, and Assistant District Attorney Sprecher closed for the State after noon. Public interest in the case has not flagged and the verdict is awaited anxiously.

At 9 o'clock the jurors were called into the courtroom and questioned by the Judge. The foreman announcedath that they had taken five ballots and were evenly divided and he did not think the jury could agree. The court and counsel are considering whether simple assault can be included in the charge of murder after the former jury brought in a verdict of manslaughter only.

lar Correspondence.) The City Trustees met in regular session yesterday evening. The board was called to order at 7:30 o'clock under the rules which provide for that hour of meeting for the winter months. There were present Carrillo, Jones and Roth.

After the minutes of the last meeting were approved, the report of the Finance Committee, approving bills amounting to \$1017.17, was presented, and the bills were ordered paid. Besides the salaries and routine bills, there was an item of \$96 for lumber used in bridge repairs, and \$34.50 expenses in the suit made necessary for abating the nuisance of the Bernard warehouse on the South side.

The committee reported in favor of re-advertising for bids for collecting garbage, and the report was adopted.

The Committee on Ordinances reported in favor of the ordinance stablishing the grade on a portion of Promenade, which report was accepted and the ordinance daopted.

On motion the vote at the last meeting by whigh the ordinance changing the grade of Fourth street south of Utah street was reconsidered, and the ordinance referred to the Street Committee.

Water Schemers Said to Have a Big Sack Ready for Use.

SAN DIEGO, Nov. 5.—(Regular Cor-respondence.) It is a matter of open comment on the streets that a brokendown political back is now in the service of the water schemers trying to mold public opinion in favor of one of the water propositions which the schemers desire the city to accept. This political back is reported to have a bag with the equivalent of \$150,000 therein, presumably for use in case of emergencies. The \$150,000 is not in gold but is said to consist of paper promises, which will be convertible into gold in case the scheme succeeds. The board of delegates on Monday night considered a motion for the appointment of a special water committee to consider the Flume Company's last proposition. It was so promptly voted own as to be almost indicative of the temper of these city fathers in favor of the opposition to the Flume people. down political hack is now in

San Francisco Firm Negotlating for Summerland Oil. SANTA BARBARA, Nov. 5.—(Regu-

lar Correspondence.) George D. Easton, of the firm of Easton & Eldridge of San Francisco, is in the city for the purpose of negotiating with the Summerland oil men to buy the entire output of their men to buy the entire output of their wells for 75 cents per barrel. The Summerland wells are producing 400 barrels a day. Mr. Easton's firm wants the oil men to sink enough wells to make the output between 4000 and 5000 barrels daily, and Mayor Williams of Summerland says that enough wells will be sunk to meet the requirements. The Summerland people are in high spirits over this matter and believe that it over this matter, and believe that it will give great impetus to business in their section. There is no doubt that

Capt. Ferdinand Westdahl of the United States Coast and Geodetic Survey is in Santa Barbara. The object of his visit is to make a thorough survey of San Miguel Island. It is reported that his recommendations will include either a lighthouse on the island or a whistling buoy.

Edward C. Jones, chief engineer of the San Francisco Gas Company, is at the Arlington Hotel with his wife.

The amount of business in the Recorder's office for the month of October was greater by 35 per cent. than in October, 1834, and the best that has been done since the boom days. If the difference in fee charges is considered, the business of last October will compare favorably with that of the boom days, for the fees in the latter were much higher than now. This shows that Santa Parbara is feeling the warmth of returning prosperity.

Good Definition of "Americanism.

Good Definition of "Americanism."
(Robert Grant in the November Scribner's:) It seems to me to be, first of all, a consciousness of unfettered individuality coupled with a determination to make the most of self. One great force of the American character is its naturalness, which proceeds from a total lack of traditional or inherited disposition to crook the knee to any one. It never occurs to a good American to be obsequious. In vulgar or ignorant personalities this point of view has sometimes manifested itself, and continues to manifest itself, and continues to manifest itself, in swagger or insolence, but in the finer form of nature appears as simplicity of an unassertive yet dignified type. Gracious politeness, without condescension on the one hand, or fawning on the other, is noticeably a trait of the best element of American society, both among men and women.

Curious Facts Concerning Sound.

(Harper's Round Table:) An inquiry was recently made in London as to the greatest distance at which a man's voice could be heard, leaving, of course, the telephone out of consideration. The reply was most interesting, and was as follows: Eighteen miles is the longest distance on record at which a man's voice has been heard. This occurred in the Grand Canyon of the Colorado, where one man shouting the pame of "Bob" at one end his voice was plainly heard at the other end, which is eighteen miles away. Lieut. Foster; on Peary's third Arctic expedition, found that he could converse with a man across the harbor of Port Bowen, a distance of 6696 feet, or about one mile and a quarter; and Sir John Franklin said that he conversed with ease at a distance of more than a mile. Dr. Young records that at Gibraltar the human voice has been heard at a distance of ten miles.

Young records that at Gibraltar the human voice has been heard at a distance of ten miles.

Sound has remarkable force in water. "Colladon, by experiments made in the Lake of Geneva, estimated that a bell submerged in the sea might be heard a distance of more than sixty miles. Franklin says that he heard the striking together of two stones in the water half a mile away. Over water or a surface of ice sound is propagated with great clearness and strength. Dr. Hutton relates that on a quiet part of the Thames near Chelsea he could hear a person read distinctly at the distance of 140 feet, while on land the same could only be heard seventy-six feet. Prof. Tyndall, when on Mont Blanc, found the report of a pistolshot no louder than the pop of a champagne bottle. Persons in a balloon can hear voices from the earth a long time after they themselves are inaudible to people below.

THE GIRLS OF JERUSALEM. They Know Nothing of Social Life; No Commingling of the Sexes.

No Commingling of the Sexes.

Of social life the girls of Jerusalem know nothing — absolutely nothing, writes Edwin S. Wallace, United States Consul at Jerusalem, in November Ladies' Home Journal. They occasionally meet, a few together, and appear to enjoy each other's company a little. They talk about their household work—which is really everything they know—and induge in some light, gossipy chat about friends, though their gossip is never of a harmful kind. In conversation they show some little animation and spirit, but, being ignorant and illiterate, they have no idea of grammatical form of expression. Occasionally cards, dominoes and checkers are played, but the native girls have little inclination for any pastime involving mental effort. Such things as dancs, fetes and fairs are unknown to the girls of Jerusalem: the Arlington Hotel with his wife.

Katie M. Clark and William Clark have brought suit against George P. Brown to set aside a sheriff's deed and a deed given to the defendant by the plaintiffs. It appears that the plaintiffs borrowed money from the defendant, and, when the debt came due, could not pay. The property, which was given in mortgage to secure the debt, was sold under decree of court. The plaintiffs claim to have entered into an arrangement whereby the defendant agreed to extend the time of payment and waive rights under the sheriff's sale. The value of the property involved is \$25,000.

The Potato's Genesis Unsolved.

The Potato's Genesis Unsolved.

The early naturalists differed greatly as to the origin of the potato, writes John Gilmer Speed in November Lades' Home Journal. In England it was held to be a native of Virginia, and in Spain it was said to have originated in Peru. Modern opinion holds that it is indigenous to the elevated tablelands of Chill, Peru, Bolivia, Costa Rica, Mexico and southwestern United States. It probably got to Virginia by the hands of some early Spanish explorers. It is certain, however, that it was not cultivated in Virginia till far into the eighteenth century and then it was introduced in the American colonies on account of the esteem in which it was held in Europe.

Prof. Joly of Paris points out that crime is increasing in France, while the population decreases. The increase of youthful offenders is specially alarming. From 16,000 in 1860 they increased to 31,000 in 1890. On the other hand crime is steadily decreasing in England. Prof. Joly thinks this is due to the ef-forts of private societies for the preven-tion of crime.

MANSFIELD, O., May 27, 1895.
"It was about four years ago that I notified such a distressed feeling in my stomach after eating. My friends told me it was dyspepsia, friends told me it was dyspepsia, and each one recommended a different remedy. After trying almost everything without success, I noticed a Ripans Tabules advertisement in a local paper, and I made up my mind to give it a trial. After asking various druggists about the Tabules, I at last secured the much-sought cure. The relief which they gave me immediately was such that convinced me that I had at last found a cure. I cannot praise found a cure. I cannot praise them too highly, and recommend them to all humanity who are them to all humanity who are suffering with indigestion and dyspepsia. I am not troubled now with that grouchy ill-natured feeling, and my friends think I am more sociable than I have been for years. All thanks due to Ripans

FURNISHING A FLAT.

Stuffs and Fittings for Small (CONTRIBUTED TO THE TIMES.)

There are apartments and apartments, flats and flats, every one of them decorated and furnished according to the means and desire of the possessor. The walls of course should be

wall paper can be substituted—the vogue this season being of a cream tint with a deep frieze of rich neutral tones admirably blended, in which gilt is the abundant charm.

Where cellings are low, use nofigures, merely a tint and that of a delicate hue. This style of treatment increases the height of the celling, which, of course, is most desirable. In papering a room much depends on the hanging of its pictures, and perhaps it is to the dining-room alone that an extratone of color in paintings is admissible.

FLOOR COVERINGS. In the furnishing of floor coverings this season rugs of olives, terra cottas this season rugs of olives, terra cottas and browns have asserted themselves. The Japanese rug has at last lost favor and Smyrna and Persian are used. Various methods of treating the outside border of the floor are tried. First by using China matting. Second, by filling, which is a carpet of plain tone. Third, by denim, and lastly by a Japanese varnish. The spruce floor is of course very elegant; but it is only in the Eastern States that it can be purchased at a reasonable value. WINDOWS AND TRANSOMS.

In all flats there are small windows which lend their light to other roomstransoms to let in the air. And these need most careful treatment. Indian silk, liberty satins, delicate plushes, a yard or two of which will do wonders as drapery, are admirable combined with a quaint jug, a piece of Dutch Delf or a coarse piece of pottery. In the polling of curtains, the gilt and oxidized are best. This is certainly a fine heading either for plush or lace. As for curtains this season, the variety is legion. Of the lace, Marle Antoinette is one of the most beautiful, a fine net in which applique work of flowers, bow knots and leaves do excellent duty, the price \$15.75. Another, even more artistic than this, is the Nubrian, a deep cream net, almost an ecru, with a design of cream insertion a quarter of a yard wide, and for an edge a scalloped pattern, which for beauty is unsurpassed. But if a heavy curtain is desired for these rooms, then there are velours of all kinds, which, if lined with solid colors, do double duty to doors. The newest is the Daghestan, and as a covering will furnish the entire room, being rich in coloring, strong in texture, with a pattern that remains in fashion for all time. Others like the Century, the Flax, the Vandyck, Armoure and Louis XVI, all will grace any rooms, however small. Among the newest is the Beaufort of the sixteenth century, in which the pattern is so small that at a distance it has the effect of a solid color, and admirable for libraries.

In every apartment the screen is ab. In all flats there are small windows TEA-TABLES AND SCREENS.

Tea-tables for these places are more cheering than ever. The newest is the two-tier mahogany, most elaborated by gilt handles and the like, and at not such a wonderful price, \$11.50. Then the very newest is the cherry table, over which are scattered brilliant medallions in Dresden china; and still another is offered more unique than all the rest, which are used as a tea-table

the rest, which are used as a tea-table or cabinet. Three tiers of thick glass, round in form, are supported by Dresden china legs which are highly ornamented by flowers.

For these pretty objects the Roccochina in tea sets is the latest fad. For its border it has a jewel work with gilt in broad splashes, and as an ornamentation in colors, pink and blush roses with long stems and leaves. Any of these pieces can be purchased separately, particularly the tea pot, sugar bowl and milk jug.

Mr. Cleveland's Early Life.

(November Scribner's:) Grover Cleveland was born in Caldwell, N. J., March 18, 1837, his father a Presbyterian clergyman. When the future President was 4 years old, his father removed to Fayetteville, N. Y. Here the lad found employment in the "general store" at \$50 a year, sweeping and cleaning out, opening and closing the store, and waiting on customers. Young Cleveland's education, so far as it went, was completed at Clinton, N. Y. In his seventeenth year he became a clerk and an assistant teacher in the New York Institution for the blind. In 1855 he started West to secure more lucrative employment, but was soon at work in a law office there, as clerk and copyist, at \$4 per week. Two years later he was admitted to the bar, retaining for some time his clerkship, first at \$600 a year and then at \$1000. In 1853 he was chosen Assistant District Attorney of, Erie county, in 1879 Sheriff of the county, in 1881, by a union of Republicans, Democrats, Independents and "Reformers," he was elected Mayor of Buffalo.
